Re:Form No.

A24-1495-5

This Newsletter No. N20-1401.48

Date

August 4, 1969

Accumulative Index of Publications and Programs - IBM 1401

Section 1: Form Numbers of publications included in the 1401/1460 Systems Reference Library are listed below, with the edition suffix of all current editions shown. When more than one edition of a publication is current, the form number is followed by *. Any Technical Newsletter applying to a later edition also applies to all prior editions but is only listed once. If the changes released in Technical Newsletters are inserted in their proper place, each current edition will correspond to any of the others. # These items are for World Trade Use Only; not available in U.S.A.

Changes since the last edition of this Newsletter are in parenthesis.

Section 2: The abstracts which follow will be included in the next edition of the Bibliography Entries added to this SRL Newsletter are identified by a vertical line in the left margin.

A24-3072 IBM 1402 CARD READ-PUNCH COMPONENT DESCRIPTION

This publication covers the IBM 1402 Models 1,2,3,4,5, and 6. Included are descriptions of major mechanical units, their functions and operating controls, and special features that can be installed to expand the capabilities of the basic machine.

Additional publications concerning 1402 operation with various IBM data processing systems are listed in the SRL bibliography for the specific system. The biliography lists all technical reference literature and related materials necessary for planning, programming, installing, and operating the data processing system in any configuration.

A24-3073 IBM 1403 PRINTER COMPONENT DESCRIPTION

03

13

This reference publication describes the various models of the IBM 1403 Printer used with IBM 1401, 1410, 1440, 1460, 7010, 7040, 7044, and System/360 Models 20, 25, 30, 40, 50, 65, and 75 Data Processing Systems.

The functional and operating characteristics of the printer are presented.

The special features available for the 1403 are included, and timing information is given for printing and paper movement. 56 pages.

A24-3081 MARK READ STATION (SLANTED MARK) FOR IBM /1418 AND IBM 1428

This publication describes the Mark Read Station (Slanted Mark) special feature. This feature is available for the IBM 1418 Optical Character Reader, and for the IBM 1428 Alphameric Optical Reader. A description of these functional specifications is included:

Document Specifications Mark Reading

Document Format

Document Corner Cuts

Document Feeding

The Slanted Mark Reading Gage is also fully described.

This publication is for those familiar with programming and operating the IBM 1418 and 1428, as described in these System Reference Library publications:
Programming for the IBM 1418 and IBM 1428 Optical Readers, C24-1091

IBM 1418 Optical Character Reader and IBM 1428 Alphameric Optical Reader, A24-1473. 12 pages.

IBM 1443 PRINTER MODELS 1 TO 4 AND N1 IBM 1445 PRINTER MODELS 1 AND N1

03

This reference publication describes the operation of the IBM 1443 and 1445 Printers with the IBM 1240, 1401, 1440, 1450, 1460, 1800, and certain models of the IBM System/360 Data Processing

It also discusses timing information for the printer and the tape-controlled carriage as well as their functional and operating characteristics. The speed of the printer using the various character sets is also described.

Included is command, status, and sense information pertaining to the printers used with System/360 Data Processing Systems.

For a list of other publications and abstracts, see the IBM Bibliography for the associated data processing system. 32 pages.

A26-5756 IBM DISK PACK AND CARTRIDGE HANDLING PROCEDURES 07

This manual is a guide for handling IBM Disk Packs and Cartridges. The information contained in this manual applies to IBM 1316 and 2316 Disk Packs and 2315 Disk Cartridges. 12 pages.

C20-1601 CATALOG OF PROGRAMS FOR IBM 1240-1401-1420-1440 AND 1460 DATA PROCESSING SYSTEMS - JUNE 1968

20

This Catalog contains a complete listing of all programs for the IBM 1240, 1401, 1420, 1440, and 1460 Data Processing Systems available from the Program Information Department, 40 Saw Mill River Road, Hawthorne, New York 10532.

Instructions for ordering programs are contained in the section of the Introduction entitled, "How to Order Programs". 80 Pages.

DISK UTILITY PROGRAMS SPECIFICATIONS IBM 1401, 1440, 1460 C24-1484 (WITH IBM 1301 AND 1311)

32

Program 1401-UT-053 Program 1440-UT-041

This publication contains the specifications of nine disk-storage utility programs for IBM 1401, 1440, and 1460 Systems equipped with either or both 1301 and 1311 disk storage. The programs are:

Clear Disk Storage

Disk to Tape

Tape to Disk

Disk to Card Card to Disk

Copy Disk

Print Disk

Disk Record Load

Disk Label

For a list of related publications and abstracts, see the publications IBM 1401 and 1460 Bibliography, Form A24-1495, and IBM 1440 Bibliography, Form A24-3005. 36 pages.

C24-1489 INPUT/OUTPUT CONTROL SYSTEM (ON DISK) SPECIFICATIONS IBM 1401 AND 1460

30

This publication presents the specifications for the IBM 1401/1460 IOCS (on Disk) Program, Version 2.

It describes the programming required to use IOCS to control the input/output of data from card reader, card punch, printer, disk, and tape files. The IOCS descriptive entries (DIOCS and DTF) and macro instructions are explained in detail. The types of processing and types of records handled by IOCS are defined.

The IBM 1401/1460 IOCS (on Disk) program is a supplement to the IBM 1401/1440/1460 Autocoder (on Disk) program. The reader should be familiar with the specifications for this program, described in the SRL publication, Autocoder (on Disk) Program Specifications and Operating Procedures, IBM 1401, 1440, and 1460, C24-3259. For a more complete understanding of the organiza-

tion of records on disk, he should also review the disk file-organization routines.

The SRL publication IBM 1401/1460 Bibliography, Form A24-1495, lists publications available for other programming systems. 72 pages.

Program Number 1401-SM-063

This publication, C24-3053-3, describes the Merge 6 program, its capabilities, phases, and merge object program. The control and parameter cards by which a user can tailor the program to his specific needs are also explained.

This publication is intended for use with Form C24-1489, Input/Output Control System (on Disk) Specifications for IBM 1401/1460.

The user should also become familiar with the following SRL bulletins:

- o Autocoder (on Disk) Language Specifications for IBM 1401, 1440, and 1460, Form C24-3258. o Autocoder (on Disk) Program Specifications and Operating Procedures for IBM 1401, 1440,
- and 1460, Form C24-3259.

Other related publications and their abstracts are listed in the IBM 1401/1460 Bibliography SRL, Form A24-1495. 42 pages.

C24-3174 COMMUNICATIONS IOCS OPERATING PROCEDURES IBM 1401 AND 1460 (1401/1460 COMMUNICATIONS IOCS - 1448/DDC)

30

Program Number 1460-IO-011

This publication provides IOCS (Input/Output Control System) operating procedures for IBM 1401 system that can include the IBM 729, 1311, 1402, 1403, 7330, and direct data-channel feature, and for IBM 1460 systems that can include these same I/O facilities plus the IBM 1448. It supplements Autocoder (on Disk) Program Specifications and Operating Procedures for IBM 1401, 1440, and 1460 Form C24-3259.

Specifications for the IOCS programming systems included in these operating procedures are available in these publications:

Input/OUtput Control System (on Disk) Specifications for IBM 1401 and 1460, Form C24-1489 IOCS Specifications for IBM 1460 with IBM 1448 (1401/1460 Communications IOCS - 1448/DDC), Form C24-3047

Direct Data Channel IOCS Specifications for IBM 1401, 1440 and 1460 (1401/1460 Communications IOCS - 1448/DDC), Form C24-3025.

These operating procedures should be used only for 1401 systems that include the direct data-channel feature and for 1460 systems that include either the IBM 1448 or the direct data-channel feature. When only IBM 729, 1311, 1402, 1403, and 7330 input/output files are to be handled, use Input/Output Control System (on Disk) Operating Procedures for IBM 1401 and 1460, Form C24-3088. 12 pages.

SORT 5 AND SORT 6 TIMING PROGRAM SPECIFICATIONS AND OPERATING C24 - 3176PROCEDURES IBM 1401 AND 1460

33

Program Number 1401-LM-062

This reference publication presents the specifications and operating procedures for the Sort 5 and Sort 6 Timing Program. An IBM 1401 or 1460 Data Processing System with the required machine configuration can be used to produce Sort 5 timing estimates for disk files to be sorted on any IBM 1440 Data Processing System, and Sort 6 timing estimates for disk files to be sorted on any IBM 1401 or 1460.

The first section of this publication discusses machine requirements, the program deck, timing considerations, and program information requirements. The second section describes system

preparation, messages, and halts.

The user should be familiar with <u>Sort 5 for IBM 1440: Specifications</u> (Form C24-3009) and Sort 5 for IBM 1440: Operation Procedures (form C24-3163), or Sort 6 Specifications for IBM 1401 and 1460 (Form C24-1420) and Sort 6 for IBM 1401: Operating Procedures (Form C24-3135).

For a list of associated publications and their abstracts see the IBM bibliography that applies to the associated IBM data processing system. 30 pages.

C24-3385 IBM 1401/1440/1460-1026 AND 1440-1448 OPERATING SYSTEMS COMPUTER ASSISTED INSTRUCTION STUDENT MANUAL

48

1440-1448 Program 1440-OS-090 1440-1026 Program 1440-OS-091 1401/1460-1026 Program 1401-OS-092

This publication describes the IBM 1052 Printer-Keyboard as used with the Computer Assisted Instruction Program (CAI). The publication:

- 1. Contains the information necessary for the student to use the printer-keyboard to receive course material from the computer.
- 2. Describes the standard features, operation, and cautions the student must exercise while using the printer-keyboard. 10 pages.

33

Program Number 1401-LM-010 (2401-2404) Program Number 1401-LM-012 (2415)

This publication contains the specifications and operating procedures for the IBM 1401 and 1460 timing program used to estimate the amount of time required to sort tape records with the IBM System/360 Disk Operating System Tape Sort/Merge program or the IBM System/360 Tape Operating System Tape Sort/Merge Program.

The following information is included in this publication:

1. Minimum machine requirements for estimating times with these programs.

2. A description of the user-prepared information cards required to define the proposed sort operation.

3. The procedure to follow for executing the timing program.

The user of this publication should be familiar with <a>IBM System/360 Disk-and Tape Operating Systems Tape Sort/Merge Program Specifications, Form C24-3438. For a list of associated 1401/1460 publications, see the IBM 1401/1460 Bibliography, Form A24-1495. For a list of associated System/360 publications, see the IBM System/360 Bibliography, Form A22-6822. 16 pages.

C24-3445 IBM 1401/1460 TIMING PROGRAM FOR IBM SYSTEM/360 DISK/OPERATING SYSTEM SORT/MERGE PROGRAM

33

Program 1401-LM-011

This publication contains the specifications and operating procedures for the IBM 1401 and 1460 timing program used to estimate the amount of time required to sort records with the IBM System/360 Disk Operating System Sort/Merge program.

The following information is included in this publication:

 Minimum machine requirements for estimating times with this program.
 A description of the user-prepared information cards required to define the proposed sort operation.

3. The procedure to follow for executing the timing program.
The user of this publication should be familiar with IBM_System/360_Disk_Operating_System, Sort/Merge Program Specifications, C24-3444. For a list of associated 1401/1460 publications, see IBM 1401/1460 Bibliography, A24-1495. For a list of associated System/360 publications, see IBM System/360 Bibliography, A22-6822. 16 pages.

H20-0507 BIBLIOGRAPHY OF APPLICATION PUBLICATIONS FINANCE INDUSTRIES 99

99

The purpose of this bibliography and the associated classification system is to list and categorize IBM application publications that are pertinent to finance industries. Section I lists these publications by application or industry. Section II contains an abstract of each publication, in form number sequence.

A periodic Bibliography of Application Publications (BAP) newsletter (N20-1077) is published to keep the bibliography up to date. The newsletter is divided into two sections. Section I is an updated listing of application publications by application or industry. This section also includes any corrections to the bibliography and a list of superseded publications. Section II contains an abstract of each publication not included in the last published bibliography. 26 pages.

H20-0522 BIBLIOGRAPHY OF APPLICATION PUBLICATIONS DISTRIBUTION INDUSTRIES

The purpose of this bibliography and the associated classification system is to list and categorize IBM application publications that are pertinent to distribution industries. Section I lists these publications by application or industry. Section II contains an abstract of each publication, in form number sequence.

A periodic Bibliography of Application Publications (BAP) newsletter (N20-1853) is published to keep the bibliography up to date. The newsletter is divided into two sections. Section I is an updated listing of application publications by application or industry. This section also includes any corrections to the bibliography and a list of superseded publications. Section II contains an abstract of each publication not included in the last published bibliography. 26 pages.

H20-0530 BIBLIOGRAPHY OF APPLICATION PUBLICATIONS PUBLIC UTILITY INDUSTRIES

The purpose of this bibliography and the associated classification system is to list and categorize IBM application publications that are pertinent to public utility industries. Section I lists these publications by application or industry. Section II contains an abstract of each publication, in form number sequence.

A periodic Bibliography of Application Publications (BAP) newsletter N20-1866 is published to keep the bibliography up to date. The newsletter is divided into two sections. Section I is an updated listing of application publications by application or industry. This section also includes any corrections to the bibliography and a list of superseded publications. Section II contains an abstract of each publication not included in the last published bibliography. 14 pages.

H20-0531 BIBLIOGRAPHY OF APPLICATION PUBLICATIONS PRINTING AND PUBLISHING INDUSTRIES

99

The purpose of this bibliography and the associated classification system is to list and categorize IBM application publications that are pertinent to printing and publishing industries. Section I lists these publications by application or industry. Section II contains an abstract of each publication, in form number sequence.

A periodic Bibliography of Application Publications (BAP) newsletter N20-1867 is published to keep the bibliography up to date. The newsletter is divided into two sections. Section I as an updated listing of application publications by application or industry. This section also includes any corrections to the bibliography and a list of superseded publications. Section II contains an abstract of each publication not included in the last published bibliography. 12 pages.

H20-0536 BIBLIOGRAPHY OF APPLICATION PUBLICATIONS INSURANCE INDUSTRY

99

The purpose of this bibliography and the associated classification systems is to list and categorize IBM application publications that are pertinent to the insurance industry. Section I lists these publications by application or industry. Section II contains an abstract of each publication, in form number sequence.

A periodic Bibliography of Application Publications (BAP) newsletter (N20-1869) is published to keep the bibliography up to date. The newsletter is divided into two sections. Section I is an updated listing of application publications by application or industry. This section also includes any corrections to the bibliography and a list of superseded publications. Section II contains an abstract of each publication not included in the last published bibliography. 22 pages.

X20-1776 144/10/6 PRINT CHART (144 POSITION SPAN AT 10 CHARACTERS PER INCH, AND 6 LINES PER VERTICAL INCH

This 11" x 18" chart is printed in green ink and provides 144 printing positions (at 10 positions per inch horizontally) for a printer carriage space-setting of 6 lines per inch. The form essentially follows the layout recommended by the SHARE organization. This chart may be reproduced using most standard office copying machines, but when the form is to be used as reproduction copy for printing documents and the grid and other preprinted information is to be "dropped-out", the printer should be instructed to use a green filter.

Only black pen ink or typewritten insertions are recommended.

Padded form - 25 sheets per pad, printed one side.

X20-1778 144/10/8 PRINT CHART (144 POSITION SPAN AT 10 CHARACTERS PER INCH, 80 AND 8 LINES PER VERTICAL INCH

This 11" x 18" chart is printed in green ink and provides 144 printing positions (at 10 positions per inch horizontally) for a printer carriage space-setting of 8 lines per inch. The format essentially follows the layout recommended by the SHARE organization. This chart may be reproduced using most standard office copying machines, but when the form is to be used as reproduction copy for printing documents and the grid and other preprinted information is to be dropped-out, the printer should be instructed to use a green filter.

Only black pen ink or typewriter insertions are recommended.

Padded form - 25 sheets per pad, printed one side.

Section 3: Program numbers of programming systems available for the IBM 1401/60 are listed below. The date of the most recent modification is given. Abstracts and ordering instructions are found in Catalog of Programs and Programming Systems, C20-1601.

SRL PUBLICATION ORDER FORM

This order form is included to simplify the ordering of additional copies of the new and revised publications and Newsletters listed in this SRL Newsletter. Please follow the instructions below carefully to insure prompt and accurate processing.

INSTRUCTIONS TO USER:

- 1. Review the SRL Newsletter and determine your requirements for additional copies of newly announced publications, major revisions, and Technical Newsletters.
- 2. Show your complete mailing address, including ZIP code.
- 3. Give to your IBM representative or mail to the IBM Branch Office serving your account.

NOTE: Newsletters issued concurrently with new and revised manuals are not listed as they are sent automatically when the manual to which they refer is ordered.

INSTRUCTIONS TO BRANCH OFFICE:

- 1. Complete the block in upper left corner.
- 2. For orders to be shipped to the Branch Office, omit address and check box below address label.
- 3. All orders must be signed by authorized person. Authorization implies approval to send Y-prefixed items (Restricted Distribution) to the address indicated.
- 4. Forward to the IBM Distribution Center for processing.
