Reference Book

First Edition (June 1983)

Changes may be made periodically to the information herein.

References in this publication to IBM products, programs, or services do not imply that IBM intends to make these available in all countries in which IBM operates. Any reference to an IBM program product in this publication is not intended to state or imply that only IBM's program product may be used. Any functionally equivalent program may be used instead.

Publications are not stocked at the address given below. Requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form for readers' comments is provided at the back of this publication. If the form has been removed, comments may be addressed to IBM Corporation, Department 95H, 11400 Burnet Road, Austin, Texas, U.S.A. 78758. IBM may use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

ABOUT THIS BOOK

Purpose and Audience

This book is intended for operators who use the IBM Displaywriter System.

Contents

This book contains five major sections to help you locate information. In this book you will find a section on menu sequences, charts, and prompts and messages, as well as an index and a glossary.

Related Publications

A description of related publications is provided in the *Operator Guide to Training*.

Data Security

All magnetic media are subject to physical damage, erasure, and loss for a variety of reasons, including operator error, accidental occurrences, and machine malfunction. In addition, magnetic media are subject to theft. Therefore, an integral part of any informational system should be to establish and implement backup (duplication) procedures. The customer, not IBM, is solely responsible for establishing and implementing all such procedures.

Reference Book / Table of Contents

Section 1: Prompts and Messages

How to Use	1
Numerical Listing	3
Alphabetical Listing	6

Section 2: Charts

Metric Conversion	1
Graphic Codes	3
Keyboard Arrangements	11
Proportional Spacing Values	27
Sort Order (for Reportpack Only)	28
Controls Allowed in a File Text Field (for Reportpack Only)	31
Display Screen Information	33
IBM Supplies	37
IBM Displaywriter Training Materials	39

Section 3: Menu Sequences

Section Description	1
Example	2
Typing Tasks	4
Work Diskette Tasks	6
Program Diskette Tasks	7
Spelling Tasks	8
Key-To-Print Tasks	9
Merge Tasks	10
Textpack Request Tasks	11
Format Selection Tasks	12
Instruction Tasks for Text	13
Instruction Tasks for Headers/Footers	14

Section 4: Glossary

How to Use	1

Section 5: Index

HOW TO USE THE PROMPTS AND MESSAGES

This section lists the prompts and messages that can appear on the screen. The prompt or message is listed in the first column. The cause of the prompt or message is listed in the second column. The action you take is listed in the third column.

The numerical messages are listed first. These messages usually appear during an initial program load.

Next, the alphabetical prompts and messages are listed in the order of the first character on the screen. If a displaying prompt or message starts with the name of your document or diskette enclosed in parentheses, look up the first character that follows your document or diskette name.

If you follow the action given for a message and the message continues to display, go to the *IBM Displaywriter System Problem Determination Guide*.

PROMPT/MESSAGE	CAUSE	ACTION
* 06*	<p>The Volume 02, 03, or 04 program diskette was loaded before the Volume 01 program diskette.</p> <p style="text-align: center;">OR</p> <p>An error was detected during program load.</p>	<ol style="list-style-type: none"> 1. Remove all diskettes from the diskette unit. 2. Load the Volume 01 program diskette in the right diskette slot and close the handle. <ol style="list-style-type: none"> 1. Go to Step 1 in the <i>IBM Displaywriter System Problem Determination Guide</i>.
* 11*	<p>The Volume 01 program diskette can now be inserted or is incorrectly inserted in the dual diskette unit.</p>	<p>Insert the Volume 01 program diskette correctly in either slot.</p> <p>For more information, see <i>Starting Your Training</i>, Lesson 1, Segment 2.</p>
* 15*	<p>The Volume 01 Program Diskette can now be inserted, or is incorrectly inserted, in the single diskette unit.</p>	<p>Insert the Volume 01 program diskette correctly in the diskette slot.</p>
* 19*	<p>The Volume 01 program diskette is not inserted in the left slot or is incorrectly inserted in the left slot of a dual diskette unit.</p>	<p>Insert the Volume 01 program diskette correctly in the <i>left</i> diskette slot.</p>

PROMPT/MESSAGE	CAUSE	ACTION
* 60*	<p>The Volume 02, 03, or 04 program diskette was inserted before the Volume 01 program diskette.</p> <p style="text-align: center;">OR</p> <p>An error was detected during program load.</p>	<ol style="list-style-type: none"> 1. Remove all diskettes from the diskette unit. 2. Insert the Volume 01 program diskette in the left slot and close the handle. <p>Go to Step 1 in the <i>IBM Displaywriter System Problem Determination Guide</i>.</p>
* 91*	<p>The Volume 01 program diskette is not inserted in the right slot or is incorrectly inserted in the right slot of the dual diskette unit.</p>	<p>Insert the Volume 01 program diskette in the <i>right</i> diskette slot.</p>
* 95*	<p>The system requires the Volume 01 program diskette, but the diskette in the single diskette unit is not a Volume 01 program diskette.</p>	<ol style="list-style-type: none"> 1. Remove the diskette currently inserted. 2. Insert the Volume 01 program diskette.
* 99*	<p>The system requires the Volume 01 program diskette, but neither diskette in the left or right diskette slot of the dual diskette unit is a valid program diskette.</p>	<ol style="list-style-type: none"> 1. Remove the diskette currently inserted. 2. Insert the Volume 01 program diskette in either slot. <p>Go to Step 1 in the <i>IBM Displaywriter System Problem Determination Guide</i>.</p>
* ____* (all other 2-digit number messages)		

PROMPT/MESSAGE	CAUSE	ACTION
* 801*	<p>You have typed a sequence of keys the Displaywriter does not recognize.</p> <p style="text-align: center;">OR</p> <p>You have a machine problem.</p>	<ol style="list-style-type: none"> 1. Remove all diskettes from the diskette unit. 2. Turn the printer power on. 3. Turn the system power off. 4. Turn the system power back on. 5. Wait about 20 seconds. 6. If the message number reappears, go to Step 1 in the <i>IBM Displaywriter System Problem Determination Guide</i>.
* 90B*	You have pressed the Memory Record button twice to request a Memory Record operation.	<ol style="list-style-type: none"> 1. Insert the Memory Record diskette in the <i>left</i> diskette slot. 2. Continue with the <i>IBM Displaywriter System Problem Determination Guide</i>.
* 902*	The system has successfully completed a Memory Record operation.	Continue in the <i>IBM Displaywriter System Problem Determination Guide</i> .
* 900* through * 999* (all others)	An error was detected during a program load or during the operation of the system.	Go to Step 1 in the <i>IBM Displaywriter System Problem Determination Guide</i> .

PROMPT/MESSAGE	CAUSE	ACTION
<p>Abbreviation not specified; type abbreviation and press ENTER.</p>	<p>You pressed MENU BYPASS and pressed ENTER without typing an abbreviation.</p>	<p>Type the menu abbreviation and press ENTER.</p> <p style="text-align: center;">OR</p> <p>Press CANCL to clear the prompt.</p>
<p>A column set extends beyond the right paper edge.</p>	<p>You are creating a multi-column file listing. One or more sets of columns extends past the right paper edge.</p>	<ol style="list-style-type: none"> 1. Use wider paper. 2. Change the document format to reflect the new paper width. <p style="text-align: center;">OR</p> <p>Reduce the number of sets of columns on a page.</p> <p style="text-align: center;">OR</p> <p>Reduce the amount of space between sets of columns.</p> <p style="text-align: center;">OR</p> <p>Reduce the width of all or some of the columns, if possible.</p>
<p>(document name) added to print queue.</p>	<p>You pressed PRINT while creating or revising a document or you chose Print Document in either the Typing Tasks menu or the Textpack Request Tasks menu. The document has been sent to the print queue for printing.</p>	<p>Continue with your work.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Adjust Line Endings = No for line.	You pressed LINE ADJ to adjust this line. However, the current choice for Adjust Line Endings in the Line Format menu is <i>No</i> .	<ol style="list-style-type: none"> 1. Move the cursor to the left margin and press CHG FMT. 2. Choose Change Line Format. 3. Set Adjust Line Endings to Yes. 4. Return to the typing area and press LINE ADJ again. <p style="text-align: center;">OR</p> <p>If you do not want to adjust the lines:</p> <ol style="list-style-type: none"> 1. Press MSG to clear the message. 2. Continue creating or revising the document.
(document name) already exists.	When the system requested the document name, you typed the name of a document that is already stored on the diskette.	<ol style="list-style-type: none"> 1. Press CANCL. 2. Type a new document name. <p style="text-align: center;">OR</p> <p>If you have selected the Create Document task and want to revise the document with the existing name:</p> <ol style="list-style-type: none"> 1. Press CANCL. 2. Choose the Revise Document task. <p style="text-align: center;">OR</p> <p>If you are in the Create File Description task and want to revise the existing file description:</p> <ol style="list-style-type: none"> 1. Press END. 2. Choose the Revise File Description task.

PROMPT/MESSAGE	CAUSE	ACTION
(diskette name) already in use.	You chose a task for a diskette that would affect the document currently being printed.	<ol style="list-style-type: none"> 1. Wait until printing is completed. 2. Select the task again.
(document name) already in use.	You are trying to use a document currently printing or queued to print.	<p>Wait until printing is complete before using the document for another task.</p> <p>OR</p> <ol style="list-style-type: none"> 1. Press MSG to display all messages. 2. Take appropriate action for each message. <p>OR</p> <ol style="list-style-type: none"> 1. Press REQST. 2. Choose Display Print Queue or Cancel Print Job to see what has been queued to print. 3. Cancel any documents you no longer want to print. <p>OR</p> <p>Work on a different document.</p>
Alternate task unavailable while Program Diskette Task active.	You chose an Alternate Foreground task while you were in a Program Diskette task. You cannot use an Alternate Foreground task in Program Diskette tasks.	End Program Diskette tasks if you want to choose an Alternate Foreground task.

PROMPT/MESSAGE	CAUSE	ACTION
Alternating Footers exist. Type footer or press CANCL to keep existing one.	You are trying to create a footer, but an alternating footer already exists.	Type the new footer to replace the current alternating footer. OR Press CANCL to keep the existing alternating footer.
Alternating Headers exist. Type header or press CANCL to keep existing one.	You are trying to create a header, but an alternating header already exists.	Type the new header to replace the current alternating header. OR Press CANCL to keep the existing alternating header.
Any user data on this diskette will be erased when ENTER is pressed.	You selected Erase Program Diskette to erase a combined program diskette. The message reminds you that when the combined program diskette is erased, any documents stored on the diskette will also be erased.	1. Press CANCL if you have documents on the combined program diskette you want to save. 2. Choose Condense Diskette to duplicate the documents onto a diskette 2D or diskette 1. OR Press ENTER to erase the combined program diskette.
Attempted to divide by zero computing (answer variable name).	Division by zero is not allowed.	Revise the math instruction in the shell document.

PROMPT/MESSAGE	CAUSE	ACTION
Begin Table not found at start of this line.	<p>You tried to use the Column Layout function, but the cursor was not on a line containing a Begin Table code.</p> <p style="text-align: center;">OR</p> <p>You tried to use the Column Layout function to revise a table that was not laid out using Column Layout.</p>	<p>Move the cursor to the line that starts with a Begin Table code.</p> <p>Revise the table without using Column Layout.</p> <p style="text-align: center;">OR</p> <p>See <i>Numeric Tables</i>, Lesson 1, Segment 1 to add Begin and End Table codes.</p>
Begin using format control already exists. Revise it or delete it.	<p>You requested the system to begin using a format in conflict with the one already in effect.</p>	<ol style="list-style-type: none"> 1. Move the cursor under the ⏏ or ⏏ code. 2. Press ENTER to see the Format currently in effect. 3. Revise or delete it. <p style="text-align: center;">OR</p> <p>Press CANCL and make another selection.</p>
Cannot append document containing footnotes.	<p>You are copying to or from a document containing footnotes created with footnote codes.</p>	<p>If you need to add text to the document revise it and type the new information.</p> <p style="text-align: center;">OR</p> <p>Delete the footnote code.</p>
(Key-To-Print) cannot be cancelled. Press ENTER, then end task.	<p>You attempted to cancel a Key-To-Print job from the Display Print Queue or Cancel Print Job menu. You cannot cancel Key-To-Print.</p>	<ol style="list-style-type: none"> 1. Press ENTER enough times to reach the Instructions menu. 2. Press END.

PROMPT/MESSAGE	CAUSE	ACTION
Cannot cancel. Task should be ended.	While using Key-To-Print, you pressed Cancel on the printer.	Press END to end the task.
Cannot construct character.	The keyboard you are using does not support the character you are trying to create.	Check the character and type it correctly. OR Change the keyboard ID to one that supports the character you want.
Cannot Create New Combined Program Diskette. IPL with 1 instead of 2D.	You loaded the initial program with a combined program diskette and selected Create New Combined Program Diskette in the Textpack Program Diskette Tasks menu. The system can create a combined program diskette <i>only</i> if the Volume 01 program diskette is a Type 1.	<ol style="list-style-type: none"> 1. Remove all diskettes. 2. Turn the system off. 3. Turn the system on again. 4. Perform an initial program load with the Volume 01 program diskette.
Cannot delete last field.	There is only one field in the Record Selection frame. One field must be displayed. You cannot delete this last field.	<ol style="list-style-type: none"> 1. Cursor down to a field entry area. 2. Press CANCL until all fields are restored. <p>OR</p> <p>If you no longer want the file, delete it using the Delete Document task.</p>
Cannot duplicate a file to itself.	In the Duplicate Selected Records task, you gave the new file the same name as the file you are duplicating from. The two files must have different names.	Enter a different name for the new file.

PROMPT/MESSAGE	CAUSE	ACTION
Cannot insert text within formatted text.	You tried to type between a Begin Formatted Text code and an End Formatted Text code.	1. Move the cursor to another area. 2. Continue with your work. OR Cancel the function.
Cannot insert text within formatted text. Move cursor or press CANCL.	You tried to type between a Begin Formatted Text code and an End Formatted Text code.	1. Move the cursor to another area. 2. Continue with your work. OR Cancel the function.
Cannot insert text within highlighted text. Move cursor or press CANCL.	You moved the cursor into text highlighted for a function such as Move or Copy.	Move the cursor out of the highlighted text. OR Press CANCL to cancel the function.
Cannot load language. Diskette (diskette name) was not used for IPL.	You are trying to load a language from a Languagepack program diskette, but you used a Textpack 4 or 6 program diskette to perform the initial program load. When you are using Textpacks 4 or 6, you can only use Languagepack 2.	Load the appropriate Languagepack 2 program diskette and load the language.
Cannot load Spelling Aid. Diskette (diskette name) was not used for IPL.	You pressed the AID key. The Spelling Correction Aid is not available with the Volume 01 you used to perform the initial program load.	1. Perform the initial program load with (diskette name). 2. You may now use AID key to request the Spelling Correction Aid.

Prompts and Messages / Alphabetical Listing

PROMPT/MESSAGE	CAUSE	ACTION
Cannot merge document containing footnotes.	Using Merge/File Text you tried to merge a shell document that contained footnotes with a file.	<ol style="list-style-type: none"> 1. Delete the footnotes from the shell document. 2. Start the task again.
Cannot move above start.	You pressed SCREEN UP when the cursor was at the top of the first page in the document.	Continue with your work.
Cannot move or copy text into formatted text.	You tried to use the Move, Copy, or Get function between Begin Formatted Text and End Formatted Text codes.	Continue with your work.
Cannot move past boundary.	You pressed SCREEN RIGHT or SCREEN LEFT when the screen was already at its left or right limit.	Continue with your work.
Cannot move past end.	You pressed SCREEN DOWN when the cursor was at the end of the document.	Continue with your work.
Cannot move past right printer edge.	In the Left Margin and Tabs for Key-To-Print menu, you used either the space bar or the → key on the keyboard to move the printer element to the printer edge. You cannot move the printer element any farther.	<p>Use the BKSP key to move the print element to the left if you used the space bar.</p> <p style="text-align: center;">OR</p> <p>Use the ← key to move the printer element to the left if you used the → key.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Cannot overstrike in character field. Please type again.	The keyboard you are currently using does not support the character you created using the REQD BKSP key or Dead key.	Check the character and type it correctly. OR Change the keyboard ID to one that supports the character you want.
Cannot paginate document containing footnotes.	You are trying to paginate a document containing footnotes. The document was created on a higher level Textpack that allows Footnote codes.	<ol style="list-style-type: none"> 1. Delete the Footnote code. 2. Paginate the document.
Cannot paginate document. Page endings should not be changed.	You are trying to paginate a document created on a higher level Textpack that has Adjust Line Endings set to No. You cannot paginate a document with Adjust Line Endings set to No.	Paginate the document using the Revise Document task.
Cannot print Footnote. Too much Footnote text.	While printing a document, the system found a footnote that was too large to fit on the bottom of the page. This message is inserted on the line where the footnote would have been.	<ol style="list-style-type: none"> 1. Reduce the amount of footnote text. 2. Print the document again.
Cannot recall keystrokes while playback or Save is active.	While saving or playing back keystrokes, you tried to recall saved keystrokes.	Continue with your work.

PROMPT/MESSAGE	CAUSE	ACTION
Cannot recover index on this diskette. Another diskette will be needed.	The diskette that needs recovery is damaged. A different diskette will be necessary for recovery.	<ol style="list-style-type: none"> 1. Insert a different diskette. 2. Respond to the prompt(s). 3. Press ENTER. 4. Press END to end the task.
Cannot remove page end.	<p>You tried to delete or move the last Page End code in a document. It cannot be removed. This Page End code is the one that moves along with the cursor as you create a new document. The system stores it as the document.</p> <p>OR</p> <p>You tried to delete or move a Page End code that is located next to a Format Change code at the beginning of a page in a document.</p> <p>OR</p> <p>You tried to delete a Page End code in a file text field.</p>	<p>To start a new page, press PAGE END.</p> <p>Move the cursor to include the ⏏ , ⏏ , ⏏ , or ⏏ symbol.</p> <p>None. You cannot delete the Page End code.</p>
Cannot revise format change to a return.	You chose a return format item while revising a format change.	<ol style="list-style-type: none"> 1. Press ENTER to return to the typing area. 2. Delete the Format Change (⏏). 3. Press CHG FMT to make necessary format changes.

PROMPT/MESSAGE	CAUSE	ACTION
Cannot sort on Text Field (field name).	You recalled a file setup containing a character field or a math field in the Sort Order menu that has the same name as a text field in the file you are using now. You cannot sort on a text field.	<ol style="list-style-type: none"> 1. Press ENTER. A new message appears telling you the name of the file in use when the file setup was created. 2. Press ENTER again. The file setup, with the exception of the sort field in error, is recalled. 3. Make any necessary changes to the Sort Order menu. 4. Press ENTER to continue with the task. <p style="text-align: center;">OR</p> <p>Recall a different file setup.</p>
Cannot store keystrokes while playback or Save is active.	You are trying to store saved keystrokes while you are still saving keystrokes.	<ol style="list-style-type: none"> 1. Press KEY SAVE to stop saving keystrokes. 2. Store the keystrokes as required.
Cannot Store Supplement. Diskette (name) was not used for IPL.	You are trying to store a supplement to a spelling dictionary on a program diskette. The program diskette you are trying to store the supplement on is not the diskette you used for the initial program load.	<ol style="list-style-type: none"> 1. Load the diskette you used for the initial program load. 2. Store the supplement on the program diskette you used for the initial program load. <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Perform an initial program load with the program diskette you want to store the supplement on. 2. Store the supplement.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Cannot type in non-typing area. Move cursor.</p>	<p>You are trying to type in a non-typing area. OR You tried to reach a specific area by using the cursor movement keys instead of the space bar or tab.</p>	<ol style="list-style-type: none"> 1. Move the cursor to a typing area. 2. Continue typing. <p>Use the space bar or tab to reach the area.</p>
<p>Card did not feed. Insert cards and press ENTER, or press END.</p>	<p>No card was fed during the Read Magnetic Card task.</p>	<p>Straighten and reinsert the cards, or insert more cards to continue. OR Press END to cancel recording of the document. OR To record more pages:</p> <ol style="list-style-type: none"> 1. Insert more blank cards in the pack feed slot. 2. Press ENTER.
<p>Card Error. Remove card and press ENTER, or press END.</p>	<p>An error is on the card and it cannot be used for recording. OR A card is in the single card slot.</p>	<p>Straighten and reinsert the cards. OR</p> <ol style="list-style-type: none"> 1. Insert more cards. 2. Press ENTER to continue. <p>OR</p> <ol style="list-style-type: none"> 1. Remove the card. 2. Press ENTER to cause the next card to feed. Recording resumes.

PROMPT/MESSAGE	CAUSE	ACTION
Card Error. Remove, wipe off, reinsert card and press ENTER, or press END.	An error is on the card.	<ol style="list-style-type: none"> 1. Remove, wipe off, and reinsert the card. 2. Press ENTER to continue the mag card operation, or press END to cancel the mag card operation.
Card jam. Check for jammed card and press ENTER, or press END.	A magnetic card has jammed.	<ol style="list-style-type: none"> 1. Check the unit for the jammed card. 2. Press ENTER to continue. <p style="text-align: center;">OR</p> <p>Press END to cancel the mag card operation.</p>
Change printer ribbon. Start printer.	The printer has reached the end of the ribbon.	<ol style="list-style-type: none"> 1. Put a new ribbon on the printer. 2. Press Start on the printer. 3. If the message continues to display: Go to the <i>IBM Displaywriter System Problem Determination Guide</i> for the IBM 5215 Selectric Element Printer. <p style="text-align: center;">OR</p> <p>Go to the <i>IBM 5218 Printwheel Printer Problem Determination Guide</i> for the IBM 5218 Printwheel Printer.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Changing to lower number Field Type not allowed.	You cannot change a field type to a more restrictive type in a file that already contains records. For example, you cannot change a character field to a math field because the records already in the file may contain alphabetic characters in that field.	<ol style="list-style-type: none"> 1. Create a new file description in the Create File Description task. 2. Duplicate the file using the Duplicate Selected Records task. <p style="text-align: center;">OR</p> <p>Press CANCL.</p>
Changing to shorter Maximum Length not allowed.	You cannot reduce the length of a field in a file that already contains records.	<ol style="list-style-type: none"> 1. Create a new file description in the Create File Description task. 2. Duplicate the file using the Duplicate Selected Records task. <p style="text-align: center;">OR</p> <p>Press CANCL.</p>
Character cannot be corrected using BKSP.	Certain characters such as carrier returns, page ends, and format changes cannot be deleted using BKSP. You have reached a character you cannot correct using BKSP.	<ol style="list-style-type: none"> 1. Place the cursor under the character. 2. Press DEL. 3. Press ENTER.
Character does not match field type.	The character you typed is not allowed in the current field type.	<p>Type only the characters allowed for the field type you are in.</p> <p style="text-align: center;">OR</p> <p>Check to see that you are typing in the right field.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Characters not found from cursor to end of document.	<p>The characters you want to find, delete, move, or copy are not in the text as you typed them between the current cursor location and the end of the document.</p> <p style="text-align: center;">OR</p> <p>You can only find or delete in a forward direction. The cursor may already be past the characters you want to find or delete.</p>	<ol style="list-style-type: none"> 1. Reenter the function and type the characters <i>exactly</i> as they appear in the text. 2. Check for hyphenation, punctuation, or capitalization which may affect the way the characters are found.
Characters not specified.	<p>After you pressed FIND, you pressed ENTER without typing any characters.</p>	<ol style="list-style-type: none"> 1. Move the cursor to the beginning of the page or document. 2. Reenter the function.
Check Document ended at operator request.	<p>You pressed END during the Check Document task. The task terminated. The system will continue to paginate the document if pagination was selected.</p>	<p>Continue with your work.</p>
Close printer cover. Start printer.	<p>The printer cover must be closed in order to print.</p>	<ol style="list-style-type: none"> 1. Close the printer cover. 2. Press Start on the printer to begin printing. 3. If you follow the above steps, and the message continues to display, go to the <i>IBM 5218 Printwheel Printer Problem Determination Guide</i>.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Character not on available elements. Press REQST to cancel or continue printing.</p>	<p>The system has encountered a character that is not currently available with your system. Your choices in the PRINTER DESCRIPTION menu and/or the WORK STATION DESCRIPTION menu determine which elements are available.</p>	<p>Press REQST. In the TEXTPACK REQUEST TASKS menu, choose:</p> <ul style="list-style-type: none">• Display Print Queue or Cancel Print Job to cancel the printing. You may want to cancel the printing, revise the document, then print it again.• Continue Printing With Element Now On Printer. When you make this choice, the system will not stop again for any typestyle and/or keyboard changes. Characters not on the current print element will print as underscores. <p>Or, press REQST, and cancel the print job in the DISPLAY PRINT QUEUE OR CANCEL PRINT JOB menu. Then, change your choices in the PRINTER DESCRIPTION menu or the WORK STATION DESCRIPTION menu, and try again.</p>

Prompts and Messages / **Alphabetical Listing**

TNL SN44-2112 (21 October 1983) to S544-2262-0

PROMPT/MESSAGE	CAUSE	ACTION
Column Insert cancelled. Columns may not be deleted now.	The number of columns is less than the number specified prior to Column Insert.	Try the Column Insert function again. Do not delete any of the current column examples.
Column Insert cancelled. More than one new column specified.	You tried to insert more than one column at a time using Column Insert.	Perform the Column Insert function again and insert only one column.
Column Insert cancelled. New column not specified.	You began the Column Insert function but did not create a new column.	Perform the Column Insert function again and create a new column.
Column operation cancelled. Column too large.	The system can handle a column with up to 3,500 characters. You tried to copy a column that is too large for the system to handle.	Reduce the size of the column. OR Lay out the table as two tables.
Column too large. Press ENTER or CANCL.	While creating or revising a column you reached the maximum number of characters allowed (3,500) in a column.	1. Press ENTER to keep what you have typed. 2. Press RETURN after the Begin Table code and continue typing. OR Press CANCL to cancel the column function.
Combine task completed. Receiving diskette renamed to (name).	The Create or Update Combined Program Diskette task has been successfully completed. The system gave the diskette a program diskette name.	Reload with the combined program diskette you just created in order to use the programs on it.

PROMPT/MESSAGE	CAUSE	ACTION
Combine Task terminated.	<p>While creating or updating a combined program diskette, you pressed CANCL before typing the name of the 2D diskette to receive the programs. The Combine task did not complete.</p> <p>OR</p> <p>While creating or updating a combined program diskette, you pressed REPLY when you were instructed to insert a diskette. The Combine task did not combine.</p>	Continue with your work.
Combined level numbers not allowed.	You set Combined Level to No in the Outline Level Format menu. You then specified a combined level.	<ol style="list-style-type: none"> 1. Use BKSP or CANCL to delete the choice. 2. Make another choice.
Conditional Text instruction is invalid in Page Heading.	The text following a Page Heading instruction contains one or more Conditional Text instructions.	Delete the Conditional Text instructions from the page heading text in the shell document.
Conditional Text instruction pair must be on one line in Multi-Columns.	A carrier return or other line-ending character is between the "IF" and "End" portions of a Conditional Text instruction. Both portions of a Conditional Text instruction must be on the same line in a multi-column listing.	Delete the line-ending character.

PROMPT/MESSAGE	CAUSE	ACTION

PROMPT/MESSAGE	CAUSE	ACTION
Load envelope size (width x length mm) or (width x length in.). Start printer.	A Print Document task requiring an envelope is ready to start printing. The paper choice is in the PAGE FORMAT menu.	Load an envelope into the printer. Then either: <ul data-bbox="1023 496 1477 683" style="list-style-type: none">• press Start on the printer; or,• choose Start Printer in the TEXTPACK REQUEST TASKS menu to start printing.

Prompts and Messages / **Alphabetical Listing**

TNL SN44-2112 (21 October 1983) to S544-2262-0

PROMPT/MESSAGE	CAUSE	ACTION
Last typing line exceeded on (name).	<p>The number of lines on your page exceed the line number you specified for last typing line. Because Cancel on Error was set to No, the page printed.</p> <p>OR</p> <p>The header text is too long and there is not enough room for the text on the page.</p>	<ol style="list-style-type: none"> 1. Paginate the document. 2. Print the document again.
Last typing line exceeded on (name). Print job cancelled.	<p>Cancel on Error was set to No. Printing canceled because the text is too long to fit on the page.</p> <p>OR</p> <p>The header text is too long.</p>	<ol style="list-style-type: none"> 1. Paginate the document. 2. Print the document again.
Line number must be a whole number or end in .5.	<p>The system did not recognize the Skip to Line number you typed. The number used in a Skip to Line instruction must be a whole number or a whole number followed by .5. For example, both 25 and 25.5 are valid numbers.</p>	<p>Type a whole number or a whole number followed by .5.</p>
Line spacing must be 1 or 1/2 for Skip to Line.	<p>The specified line spacing for this document is something other than 1 or 1/2.</p>	<p>Change the Line Spacing choice for this document to either 1 or 1/2.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Line starts past right margin.	The required tabs used to indent text have placed the temporary left margin (where text would begin) past the right margin. The system inserted a hyphen and a carrier return at the right margin to prevent a long line.	Delete the extra tabs or move the right margin in your document.
Lines between footnotes larger than number of footnote lines.	In the Footnote Format menu, you specified more lines between footnotes than the maximum number of footnote text lines per page.	Choose fewer lines between footnotes. OR Choose a larger maximum number of footnote text lines per page.
Lines/cm or in. chosen not supported by the printer.	The lines per cm or in. you chose in the Line Format for Key-To-Print menu is not available with your printer.	<ol style="list-style-type: none"> 1. End Key-To-Print. 2. Change the lines per cm or in. in the Line Format for Key-To-Print menu.
(number) lines with conversion errors on page ().	You are converting a Final-form document. (number) lines have conversion errors.	Move the cursor from line to line. You will see the message "Character or control error in censored line" on any lines containing errors.
Load continuous paper size (width x length mm) or (width x length in.). Start printer.	A Print Document task requiring continuous paper is ready to begin. The choice for paper type was made in the Printer Description menu.	<ol style="list-style-type: none"> 1. Load continuous paper into the printer. 2. Press Start on the printer or choose Start Printer in the Textpack Request Tasks menu.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Load cut paper or env. size (width x length mm) or (width x length in.). Start printer.</p>	<p>A Print Document task requiring cut paper or an envelope is ready to begin printing. The choice for paper or envelope type was made in the Printer Description menu.</p>	<ol style="list-style-type: none"> 1. Load cut paper or envelope into the printer. 2. Press Start on the printer or choose Start Printer in the Textpack Request Tasks menu.
<p>Long line on (document name). Last characters not printed.</p>	<p>The system reached a line that printed past the right paper edge. Cancel on Error in the Print Document menu is set to No, or you pressed the PRINT key, which always sets Cancel on Error to No. This allows printing to continue when errors are found.</p> <p style="text-align: center;">OR</p> <p>You selected an incorrect paper size in the Page Format menu, or Adjust Line Endings is set to No and a line extends past the right margin. Cancel on error is set to No.</p> <p style="text-align: center;">OR</p> <p>You began typing the document in 12-pitch and changed to 10-pitch. Therefore, text is extending beyond the right margin.</p> <p style="text-align: center;">OR</p>	<ol style="list-style-type: none"> 1. Check the document to verify that the right margin is set to the left of the right paper edge (notice the Right Paper Edge symbol on the scale line), and is not set beyond 156 in 12-pitch, 130 in 10-pitch, or between 130 and 156 in proportional spacing (PSM). 2. If necessary, revise or paginate. <ol style="list-style-type: none"> 1. Look for the Paper Edge symbol on the scale line. 2. Determine if you should change the paper size or adjust the lines so they end to the left of the Paper Edge symbol. <p>Check the tab settings, the Paper Edge symbol, and the paper size.</p>

PROMPT/MESSAGE	CAUSE	ACTION
<p>Long line on (document name). Last characters not printed. <i>Continued</i></p>	<p>You reset the tab grid.</p> <p>If you reset the tab grid, it is only reset within the margins. If you make the margins wider, the tab grid remains the same and does not accommodate the wider margin.</p> <p style="text-align: center;">OR</p> <p>A header or footer extends beyond the right paper edge.</p> <p style="text-align: center;">OR</p> <p>You typed a table in proportional spacing (PSM). The system does not recognize the proportional space unit values in Column Layout. Your tab stops have been overridden during printing.</p>	<p>Revise the header or footer so the text is not beyond the right paper edge.</p> <ol style="list-style-type: none"> 1. Look at the printed page to see which columns overrode the tab stops. 2. Using your conversion ruler, measure the longest line of each column to count the number of spaces required to print in 12-pitch. 3. Use this new number of spaces in Column Layout. For more information on PSM, see <i>Reference Book</i>, Charts section, Proportional Spacing Values.
<p>Long line on (document name). Print job cancelled.</p>	<p>The system reached a line that printed past the right paper edge. Cancel on Error in the Print Document menu is set to Yes. The print job has been canceled.</p> <p style="text-align: center;">OR</p>	<ol style="list-style-type: none"> 1. Check the document to verify that the right margin is set to the left of the right paper edge (notice the right paper edge symbol on the scale line), and is not set beyond 156 in 12-pitch, 130 in 10-pitch, or between 130 and 156 in proportional spacing. 2. If necessary, revise or paginate.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Long line on (document name). Print job cancelled. <i>Continued</i></p>	<p>You selected an incorrect paper size in the Page Format menu, or Adjust Line Endings is set to No and a line extends past the right margin. Cancel on Error is set to No.</p> <p style="text-align: center;">OR</p> <p>You began typing the document in 12-pitch and changed to 10-pitch, which extended the text beyond the right margin.</p> <p style="text-align: center;">OR</p> <p>You reset the tab grid.</p> <p>If you reset the tab grid, it is only reset within the margins. Check the tab settings, the Paper Edge symbols, and the paper size. 2. Paginate the document. 3. Print the document. <p>Revise the header or footer so text is not beyond the right paper edge.</p>

PROMPT/MESSAGE	CAUSE	ACTION
<p>Long line on (document name). Print job cancelled. <i>Continued</i></p>	<p>You typed a table in proportional spacing (PSM). The system does not recognize the proportional space unit values in Column Layout. Your tab stops have been overridden during printing.</p>	<ol style="list-style-type: none">1. Look at the printed page to see which columns overrode the tab stops.2. Using your conversion ruler, measure the longest line of each column to count the number of spaces required to print in 12-pitch.3. Use this new number of spaces in Column Layout. <p>For more information on PSM, see <i>Reference Book</i>, Charts section, Proportional Spacing Values.</p>
<p>Long line on (document name). Printed as two lines.</p>	<p>During revision, you inserted text on a line that caused the line to go past the right paper edge. The system inserted a hyphen and a carrier return when it reached the right paper edge. It placed the remainder on the next line. Cancel on Error in the Print Document menu is set to No. This allows printing to continue when errors are found.</p>	<ol style="list-style-type: none">1. Check your document.2. If necessary, revise or paginate.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Long page on (document name).</p>	<p>The system reached a line that printed past the Last Typing Line choice in the Page Format menu. Cancel on Error in the Print Document menu is set to No. This allows printing to continue when errors are found.</p> <p style="text-align: center;">OR</p> <p>You pressed the PRINT key, which also sets Cancel on Error to No.</p> <p style="text-align: center;">OR</p> <p>You have a conflict between the header and the first typing line, or between the footer and the last typing line.</p>	<ol style="list-style-type: none"> 1. Check your document. You may have created or revised without paginating. 2. If necessary, revise or paginate. <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Check the Last Typing Line and the Paper or Envelope Size in the Page Format menu. 2. Verify that the paper size is not shorter than the last typing line. <p>Verify that the first typing line starts after the header line and that the footer line starts after the last typing line.</p> <p style="text-align: center;">OR</p> <p>Verify that you do not have extra carrier returns or indexes in the header or footer.</p>
<p>Long page on (document name). Print job cancelled.</p>	<p>In the Print Document menu, Cancel on Error is set to Yes. Printing has canceled because a line has printed past the Last Typing Line choice in the Page Format menu.</p> <p style="text-align: center;">OR</p>	<ol style="list-style-type: none"> 1. Verify the last typing line chosen for the document. 2. If necessary, revise or paginate. <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Check the Last Typing Line and the Paper or Envelope size items in the Page Format menu. 2. Verify that the paper size is not shorter than the last typing line.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Long page on (document name). Print job cancelled. <i>Continued</i></p>	<p>You have a conflict between the header and the first typing line, or between the footer and the last typing line.</p>	<p>Verify that the first typing line starts after the header line and that the footer line starts after the last typing line. OR Verify that you do not have extra carrier returns or indexes in the header or footer. OR If you do not locate the problem:</p> <ol style="list-style-type: none"> 1. Set Cancel on Error to No and print the document. This causes the message "Long page on (document name)" to display. 2. Press Start on the printer. Printing will not be canceled. The long page will probably print on two sheets of paper.
<p>Machine setup duplicated.</p>	<p>The Duplicate Machine Setup task is completed.</p>	<p>Continue with your work.</p>
<p>Machine setups for (diskette name) could not be updated.</p>	<p>The system could not update all the setups because the setups were not present on the source diskette.</p>	<p>Press ENTER to display any further messages and the diskette names for the other setups that could not be duplicated.</p>
<p>Magnetic Card Unit error. Mag Card operation cancelled.</p>	<p>When you loaded the mag card program diskette, either the mag card unit was not properly connected to the system or an error occurred that canceled the mag card operation.</p>	<p>Proceed as instructed in the <i>IBM Displaywriter System Problem Determination Guide</i>.</p>

Prompts and Messages / Alphabetical Listing

PROMPT/MESSAGE	CAUSE	ACTION
Magnetic card unit power lost. Mag card operation cancelled.	The power to the mag card unit was lost while it was reading or recording magnetic cards, which canceled the job.	<ol style="list-style-type: none"> 1. Set up the menus again to read or record the cards. 2. Turn on the power to the mag card unit.
Math instruction is invalid in Page Heading.	A Math instruction is in a page heading area of the shell document.	<p>Delete the Math instruction.</p> <p style="text-align: center;">OR</p> <p>Move the Math instruction to the correct location in the shell document.</p>
Math operation cancelled. Number too large.	When performing math, the number you moved the cursor under has more than 15 digits to the left of the decimal point.	The system cannot perform math functions on numbers having 15 or more digits to the left of the decimal point. The value of the current total is unaffected.
Math operation cancelled. Total too large.	The result of a math function caused the total to have more than 15 digits to the left of the decimal point.	The system cannot perform math functions when the total has more than 15 digits to the left of the decimal point. The previous total will be unaffected.
Maximum number of Answer Variables exceeded (20).	You have more than 20 answer variables in your shell document.	Revise the shell document by reducing the number of answer variables.
Maximum number of keystrokes saved, keystroke not saved.	The keystroke you entered will not be saved because you have reached the maximum number that may be saved.	Press KEY SAVE to end saving keystrokes.

PROMPT/MESSAGE	CAUSE	ACTION
Maximum number of pages requested to be printed.	You pressed PRINT. The print queue for pages is full. It holds up to 25 pages.	Continue creating or revising. OR 1. Wait until the page completes printing. 2. Press PRINT again.
Maximum number of Summary Math instructions has been exceeded (20).	The shell document contains more than the maximum number (20) of Summary Math instructions allowed.	Revise the shell document so that it contains no more than 20 Summary Math instructions.
Maximum number of tabs already set.	You set the maximum number of tabs allowed by the system (48).	1. Check the tab settings on the scale line and delete any unnecessary tabs. 2. Set any additional tabs up to a total of 48 tabs.
Maximum number of tabs exceeded for Multi-Column File Listing.	The system limit of 48 tabs is exceeded in the multi-column file listing. The number of tabs used in a multi-column file listing is figured by multiplying the number of tabs in a column set by the number of column sets, plus one tab between each set of columns.	Delete any unnecessary tabs. OR Reduce the number of column sets on the page.
Maximum 15 digits left of decimal exceeded in (variable name).	In the answer variable listed in the message, a math calculation resulted in a total more than 15 digits (system maximum) to the left of the decimal.	Check for invalid data.

Prompts and Messages / Alphabetical Listing

PROMPT/MESSAGE	CAUSE	ACTION
Maximum size exceeded. A length of only (number) characters may be created.	Not enough room is left in the file description to accept the maximum length you specified. The message shows the amount of space left in the file description.	Choose the maximum length shown in the message. OR Decrease the maximum length of other fields in the file to allow enough room.
Maximum size exceeded for Record Detail Text.	The text in your Record Detail instruction exceeds the limit for a multi-column file listing (2,558 characters).	Revise the text in the Record Detail instruction so that fewer characters are used.
Maximum size reached. Character or instruction could not be inserted.	You have exceeded the maximum number of characters you can enter in the Record Selection frame. The number varies with the number of fields selected and the number of rows used. OR You have typed the maximum number of characters allowed in a header, footer, or column.	Examine the field data and delete any unnecessary spaces between operators and any unnecessary equal signs (= is the default). OR 1. Do a partial selection and duplicate the selected records to a new file. 2. Make the rest of your selections in the new file.
Maximum size reached. Data could not be inserted in field.	The current field length is too short to hold the information you are trying to enter.	Revise the text so it will not reach the maximum. Use the Revise Field Description task to increase the maximum length of the field. OR Type fewer characters in the field.

PROMPT/MESSAGE	CAUSE	ACTION
<p>Maximum size reached. No more fields may be created.</p> <p>Maximum size (65000 records) reached. No more records may be added.</p>	<p>The file already contains the maximum number of fields allowed (100).</p> <p>You have reached the maximum Record ID of 65,000. There is no room to add more records.</p>	<p>Reexamine the file design. Combine or delete fields as necessary.</p> <p>Create a new file to hold the additional records.</p> <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Examine the file to see if any records can be deleted to allow room for more records to be added. 2. Duplicate the file, omitting the unnecessary records. 3. Add the records to the new file. <p style="text-align: center;">OR</p> <p>Renumber the file if records have been deleted.</p>
<p>Maximum size reached. No more text may be typed.</p>	<p>You have used the maximum number of character positions in the header or footer allowed by the system (256).</p> <p style="text-align: center;">OR</p> <p>During the creation or revision of a column, you exceeded the maximum number of characters allowed by the system (3,500).</p> <p style="text-align: center;">OR</p>	<p>Revise the header or footer so fewer characters are used.</p> <p style="text-align: center;">OR</p> <p>If you want to accept the text as is, press ENTER to end the creation or revision of the header or footer.</p> <p style="text-align: center;">OR</p> <p>If you want to accept the text as is, press ENTER.</p> <p style="text-align: center;">OR</p> <p>Press CANCL to cancel the column function.</p>

PROMPT/MESSAGE	CAUSE	ACTION
<p>Maximum size reached. No more text may be typed. <i>Continued</i></p>	<p>You have exceeded the number of characters allowed by the maximum length for a file text field.</p>	<p>If the maximum length for the field is less than 500 characters, use the Revise Field Description task to increase the maximum length of the field.</p> <p style="text-align: center;">OR</p> <p>Revise the text and reduce the number of characters.</p>
<p>Merge complete.</p>	<p>The system has completed a Merge task.</p>	<p>Continue with your work.</p>
<p>Merge ended. Fill-In pages not found.</p>	<p>The merge task has finished. No pages were found in the fill-in document.</p>	<ol style="list-style-type: none"> 1. Verify the name of the fill-in document. 2. Verify that pages exist in the fill-in document. 3. Start the task again.
<p>Merge ended. No switch codes found in text.</p>	<p>You chose the Merge with Switch Codes Setup task. The Merge task has finished and no Switch codes were found in the shell document.</p> <p style="text-align: center;">OR</p> <p>You chose the Merge with Switch Codes Setup task for a document that has variable names.</p>	<p>Revise the shell document to include Switch codes, if necessary.</p> <p>Choose the Merge with Named Variables Setup task.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Merge ended. No variables found in text.	<p>You chose the Merge with Named Variables Setup task. The Merge task has finished and no variables were found in the shell document.</p> <p>OR</p> <p>You chose the Merge with Named Variables Setup task for a document that contains Switch codes.</p>	<p>Revise the shell document to include variables, if necessary.</p> <p>Choose the Merge with Switch Codes Setup task.</p>
MERGE FILE/TEXT and RECORD SELECTION File Setup recalled.	<p>In recalling a file setup, the Sort menu could not be recalled because of a field incompatibility. This can happen as a result of changing one or more of the file's field names after the setup was originally stored.</p> <p>OR</p> <p>You tried to recall the wrong file setup.</p>	<p>Change the file's field names to what they were originally.</p> <p>OR</p> <ol style="list-style-type: none"> 1. Find the error messages in the output document. 2. Look up each error message in this book and correct the error.

PROMPT/MESSAGE	CAUSE	ACTION
Merge File/Text incomplete. <i>Continued</i>	While merging repetitive letters, you pressed END or a diskette error occurred before any text could be processed. Nothing printed or was stored in an output document.	Begin the Merge File/Text task again, if desired.
Merge File/Text incomplete. Use restart number to complete output.	While merging repetitive letters you pressed END and ended the task. The Restart Number in the Status frame is the Record ID number of the last record that completed processing.	If you wish to continue the task later: <ol style="list-style-type: none"> 1. Choose the Merge File/Text task. 2. Enter the Restart Number in the Merge File Task menu. 3. Enter the Sort and Select information again. Processing continues with the next qualified record that follows the Restart Number.
MERGE FILE/TEXT, RECORD SELECTION, and SORT File Setup recalled.	You used the Reportpack Request Tasks menu to recall a file setup while in the Merge File/Text frame. The message shows you which frames were included in the recalled setup.	Continue with your work.
MERGE FILE/TEXT, RECORD SELECTION, and SORT File Setup stored.	You used the Reportpack Request Tasks menu to store a file setup while in the Merge File/Text frame. The message shows you which frames were included in the stored setup.	Continue with your work.

PROMPT/MESSAGE	CAUSE	ACTION
Merge File/Text will continue when documents now queued are printed.	You specified that a Merge File/Text document print. The Merge task was interrupted because other documents are printing.	Wait; merging will continue when printing can begin. OR Press REQST and cancel the documents in the print queue ahead of your \$\$SYSDOC1 or \$\$SYSDOC2. OR If you want to print later: 1. Press END. 2. Press REQST and cancel the printing of your \$\$SYSDOC1 or \$\$SYSDOC2.
Merge File/Text will end when document now printing completes.	You pressed END to end a Merge File/Text operation. The task will end as soon as the document now printing is finished.	Wait for printing to end. OR Cancel the job now printing.
Merge unsuccessful. Output contains (number) messages.	This message indicates the number of errors which occurred during a Merge task.	1. Find the error message(s) in the merged document. 2. Look up each error message in this book and correct the error.
Merge waiting until document now printing is finished.	You specified a merge document to print. The Merge task was interrupted because another document is printing.	Wait for printing to end. OR Cancel the print job.

PROMPT/MESSAGE	CAUSE	ACTION
Merged document cannot be specified in Include.	An Include code was found that specifies the document you are creating (output document) as the Include document.	Change the output document name.
Merged document specified in Include.	An Include code was found that specifies the document you are creating (output document) as the include document.	Change the output document name.
Merged Document Name already exists. Press ENTER to add to it or END.	An Include code was found that specifies the document you are creating (output document) as the Include document.	Change the output document name.
More than Two page-formatting controls in one report section in shell.	The maximum of two page formatting controls allowed in a single report section has been exceeded. Page-formatting controls are Begin Document Format, Begin Alternate Format, Page Format Change, or Return to Document Format.	Revise the shell document so no more than two page-formatting controls are in a single report section.
Move cursor to bottom of document, then press GET.	You tried to get the same document you are creating or revising. The system can perform the Get function only if the cursor is at the end of the document.	<ol style="list-style-type: none"> 1. Move the cursor to the end of the document. 2. Press GET to get pages from the document. The page(s) will be added to the end of the document.

PROMPT/MESSAGE	CAUSE	ACTION
Move cursor to last line of table, press ENTER.	You are using the Column Layout function on an existing table.	<ol style="list-style-type: none"> 1. Move the cursor to the last line of the table. 2. Press ENTER.
Move what?	<p>You pressed MOVE. Now you must identify the end of the text to be moved.</p> <p style="text-align: center;">OR</p> <p>The cursor is in a column and you pressed MOVE.</p>	<p>Press ENTER to move one character.</p> <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Place the cursor under the last character to be moved. 2. Press ENTER. <p style="text-align: center;">OR</p> <p>Press CANCL to clear the prompt and cancel the function.</p> <ol style="list-style-type: none"> 1. Press COLUMN to move the entire column. 2. Move cursor to the new placement of column. 3. Press ENTER.
Multi-Column File Listing instructions invalid in File Report.	A multi-column instruction was found in a shell document containing File Report instructions other than a Record Detail instruction.	Revise the shell document either by deleting the multi-column instruction or the File Report instruction.
Multi-Column instructions invalid in Repetitive Letters.	A Multi-Column instruction was found in a shell document designated as a repetitive letter in the Merge File/Text menu.	<p>Revise the shell document by deleting the Multi-Column instruction.</p> <p style="text-align: center;">OR</p> <p>In the Merge File/Text menu, change the Output Choice to File Listing or Report.</p>

PROMPT/MESSAGE	CAUSE	ACTION
Multi-Column File Listing must contain Record Detail text.	No text or variables follow the Record Detail instruction in a multi-column file listing.	Add the text or the variable.
Multi-Column File Listing must have a Record Detail instruction.	Your multi-column file listing shell document contains no Record Detail instruction.	Insert a Record Detail instruction and add the text or variable, if necessary.
Must highlight all formatted text. Operation cancelled.	You are trying to block overstrike, delete, move, or copy. The text that is highlighted contains formatted text. However, the Begin Formatted Text and End Formatted Text codes are not highlighted.	<ol style="list-style-type: none">1. Block overstrike, delete, move, or copy again.2. Make sure that the necessary Begin Formatted Text and End Formatted Text codes are highlighted.
Name not specified. Type name of saved keystrokes; press ENTER.	While trying to store saved keystrokes or recall saved keystrokes, you pressed ENTER without typing a name for your keystrokes.	<ol style="list-style-type: none">1. Type a name for the keystrokes.2. Press ENTER.

PROMPT/MESSAGE	CAUSE	ACTION
(document name) needs recovery. Use recover documents.	The document you want cannot be used until it is recovered.	<ol style="list-style-type: none"> 1. Press CANCL. 2. Use the Recover Documents task to recover the document. If it cannot be recovered, you may want to type it again. <p>For more information, see <i>Diskettes</i>, Lesson 2, Segment 2.</p> <p style="text-align: center;">OR</p> <p>Press CANCL to continue using the system for other documents.</p>
New document exists and additions cannot be made.	The document you are attempting to duplicate cannot be added to the document because the two documents are not compatible. For example, you cannot add a file to a text document, and you cannot add a file setup to any other type of document.	<p>Press CANCL.</p>
New document or setups exists. Press ENTER to add to it; or press END.	You are attempting to duplicate a document or setup. The name you have given the new document already exists.	<p>Press ENTER to add the existing document or setup.</p> <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Press END. 2. Start the task again giving the document a different name.
New document exists. Press ENTER to add to it; or press END.	The new document name that you typed belongs to a document that already exists on the diskette.	<p>Press ENTER to add the document to the end of the existing document.</p> <p style="text-align: center;">OR</p>

Prompts and Messages / Alphabetical Listing

TNL SN44-2112 (21 October 1983) to S544-2262-0

PROMPT/MESSAGE

Page will be restarted. Insert new page for Equation Print.

CAUSE

A document which uses Equation Print was in process. A paper jam or problem which requires restarting of the printer at the top of the current page has occurred.

ACTION

If this is the **second** printing of this page, insert a blank page on **top** of the paper in the paper tray. If using manual feed, line up a blank page on the Paper Support Table. Start the printer.

The page will be restarted. However, only the characters which are in this pass through the printer will be printed. If there was a previous pass which contained other characters, you must send this page to the printer again for those characters, using the appropriate typestyle/keyboard.

Variable is invalid in Page Heading.	A variable was detected in a page heading area of the shell document.	<p>Delete the variable.</p> <p style="text-align: center;">OR</p> <p>Move the variable to the correct location in the shell document.</p>
Variable not found.	There is a Variable Name code in the shell document which is not addressed in the fill-in document.	<ol style="list-style-type: none"> 1. Compare the shell document and the fill-in document. 2. Add the missing Variable Name code to the fill-in document.
(program name) was not added due to lack of disk space.	The program diskette you are copying from has too much on it to fit on the diskette you are copying to.	Choose an unused diskette to copy to.

PROMPT/MESSAGE	CAUSE	ACTION
Warning! Diskette nearly full. Data may be lost if task continues.	You are attempting to add information in the Update File task. There may not be room in the diskette for the additional information.	Press ENTER to continue (you may lose data). OR 1. Press CANCL. 2. End the job. 3. Duplicate the file to a diskette that has more available space. 4. Continue the job.
Warning! Diskette (diskette name) may be too full for task to complete.	You are attempting to output a file to diskette or to the printer. The diskette may not have enough room to complete the job.	Press ENTER to continue (you may lose data). OR 1. Press CANCL. 2. End the job. 3. Duplicate the file to a diskette that has more available space. 4. Continue the job.
When finished, press ENTER.	You are in the Auto Outline mode.	Press ENTER to accept the displayed outline entry.
When finished saving keys, press KEY SAVE again.	You pressed KEY SAVE.	When you are through saving keystrokes, press KEY SAVE again.
When finished typing table, press ENTER.	You are using Column Layout to create a table.	Press ENTER after you type the last line of the table.

PROMPT/MESSAGE	CAUSE	ACTION
When finished with this menu, press ENTER.	You are choosing in a menu.	When you have typed all choices in the menu, press ENTER again to continue.
(Diskette name) will not fit on diskette.	You are trying to update a combined program diskette. The diskette you are adding <i>to</i> does not have enough room on it to complete the task.	Press ENTER to continue. All the data will not be combined. OR 1. Press CANCEL. 2. If you wish, try again with a different 2D Diskette.
Word too long to fit between margins.	The system reached a line with no word separators (for example, a line of asterisks) that crosses the right margin.	Make a hyphenation decision. OR Delete the extra characters beyond the right margin.
Wrong diskette. Insert diskette (diskette name).	The diskette you inserted does not have the name you typed for the task.	1. Insert the required diskette. 2. Continue the task. OR 1. Press REPLY to cancel the request for the diskette. 2. Press MSG to clear the message.
Wrong diskette. Insert diskette (diskette name) in left slot.	The diskette you inserted does not have the name you typed for the task.	1. Insert the required diskette in the left slot. 2. Continue the task. OR 1. Press REPLY to cancel the request for the diskette. 2. Press MSG to clear the message.

PROMPT/MESSAGE	CAUSE	ACTION
Wrong diskette. Insert diskette (diskette name) in right slot.	The diskette you inserted does not have the name you typed for the task.	<ol style="list-style-type: none"> 1. Insert the required diskette in the right diskette slot. 2. Continue the task. <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Press REPLY to cancel the request for the diskette. 2. Press MSG to clear the message.
Wrong diskette inserted.	During duplication, you have inserted the wrong diskette for the task.	<ol style="list-style-type: none"> 1. Insert the required diskette. 2. Continue the task. <p style="text-align: center;">OR</p> <ol style="list-style-type: none"> 1. Press REPLY to cancel the request for the diskette. 2. Press MSG to clear the message.
Your choice does not match type of numbering or lettering at level "Number".	You attempted to type a combined level outline entry. The character(s) you typed for the named outline level is not allowed because it does not match the character defined for this level.	Retype the entry correctly.
Your choice does not match type of numbering or lettering for this level.	The character(s) you typed for a particular outline level is not allowed because it does not match the character defined for this level.	Use BKSP or CANCL to correct the character(s).

METRIC CONVERSION

The table to the right lists equivalents of inches to millimeters.

If the measurement you require is not in the table, multiply your inch number by 25.4 to find the millimeter equivalent. Example: If your inch number is 8:

$$8 \times 25.4 = 203.2 \text{ mm}$$

INCHES	mm	INCHES	mm
2	= 50.8	10	= 254
2½	= 63.5	10½	= 266.7
3	= 76.2	11	= 279.4
3½	= 88.9	11½	= 292.1
4	= 101.6	12	= 304.8
4½	= 114.3	12½	= 317.5
5	= 127	13	= 330.2
5½	= 139.7	13½	= 342.9
6	= 152.4	14	= 355.6
6½	= 165.1	14½	= 368.3
7	= 177.8	15	= 381
7½	= 190.5	15½	= 393.7
8	= 203.2	16	= 406.4
8½	= 215.9	16½	= 419.1
9	= 228.6	17	= 431.8
9½	= 241.3		

GRAPHIC CODES

This table describes the codes that may be typed in a text document.

The first column below lists the terms for these codes. On the screen, the terms appear on the first status line *whenever the cursor is under a code in the typing area.*

The second column below lists the graphics that represent the codes. On the screen, the graphics appear in the typing area.

The third column below describes the codes.

TERM	GRAPHIC	DESCRIPTION
Begin Formatted Text	⊕	The Begin Formatted Text code indicates the beginning of text to be formatted by the system.
Begin Keep	⇓	The Begin Keep code signals the beginning of a text area not to be split during pagination.
Begin Overstrike	→	The Begin Overstrike code indicates the beginning of text designated for overstriking.
Begin Spelling	⊕	The Begin Spelling code signals the beginning of a text area to be spell checked.
Begin Table	⇓	The Begin Table code signals the beginning of a table created with Column Layout.
Begin Und	↘	The Begin Underline code signals the beginning of text designated for underlining.

TERM	GRAPHIC	DESCRIPTION
BKSP 1	■	The backspace 1 character was typed on a non-Displaywriter system. The Displaywriter ignores this code.
BKSP 6	■	The backspace 6 character was typed on a non-Displaywriter system. The Displaywriter ignores this code.
Card Rept	■	The Card Repeat code provides compatibility for output to magnetic cards.
Carrier Return	←	The Carrier Return code signifies that the cursor has moved to the left margin or temporary left margin on a new typing line.
Conditional Text*	‡	A code that signals text to be printed or not to be printed, based on the contents of a specific field.
Ctr	•	The Center code automatically centers text around that point.
End Formatted Text	⤵	The End Formatted Text code indicates the end of text that was formatted by the system.
End Keep	⤵	The End Keep code signals the end of a text area that will not be split during pagination.
End Overstrike	↔	The End Overstrike code signals the end of text designated for overstriking.
End Spelling	‡	The End Spelling code signals the end of text to be spell checked.

* Codes used with Reportpack.

TERM	GRAPHIC	DESCRIPTION
End Table	↵	The End Table code signals the end of a table created with Column Layout.
End Und	↵	The End Underline code signals the end of text designated for underlining.
File Report Defin.*	⦿	Set Display Codes to Yes to identify the specific File Report instruction.
Footnote	⦿	The Footnote code signals a footnote reference.
Half Index Down	↓	The Half Index Down code moves the cursor or printing position one-half space below the line (subscript).
Half Index Up	↑	The Half Index Up code moves the cursor or printing position one-half space above the line (superscript).
Include	↗	The Include code signals text to be inserted from a different document.
Index	⇓	The Index code moves the print position to the next line without any horizontal movement.
Index Return	↵	The Index Return code returns the cursor or print position to the left margin and cancels a required tab (if an indent level is in effect).
Keyboard Change	■	The Keyboard Change code signals the beginning of a different keyboard arrangement.
Line Format Change	⌈	The Line Format Change code signals a format change to lines within the document.

* Codes used with Reportpack.

TERM	GRAPHIC	DESCRIPTION
Line Format Return	⌘	The Line Format Return code places the original line format back into effect.
Math*	⌘	The cursor is under a Math instruction.
Multi-Column Head'g*	⌘	The cursor is under a Multi-Column Heading instruction.
Non-Typing Area		The cursor is in an area in which you cannot type.
Null	■	The cursor is under a Null (invalid) code.
Outline Level:x	⌘	The cursor is under an Outline Level Control code. The <i>x</i> represents the outline level number.
Page End	▲	The temporary Page End is the last character of the current page.
Page Format Change	⌘	The Page Format Change code signals a formatting change to a page(s) within the document.
Page Format Return	⌘	The Page Format Return code places the original page format back into effect.
Pg. Number	⌘	The Page Number code indicates how the printed pages will be numbered.
Pg. Number: (number)	⌘	The Page Number code indicates how the printed page will number.
Req'd BKSP	⬅	The Required Backspace code moves the cursor to the left without erasing characters.

* Codes used with Reportpack.

Charts / Graphic Codes

TERM	GRAPHIC	DESCRIPTION
Req'd Carrier Ret		The Required Carrier Return code returns the cursor or print position to the left margin and cancels a required tab (if an indent level is in effect).
Required Hyphen		The Required Hyphen is a permanent part of the word.
Required Page End		The Required Page End code causes a page to end during pagination or printing.
Required Space		The Required Space code keeps words together on a line.
Req'd Tab		The Required Tab code sets a temporary left margin.
Skip to Line Instr.*		A code that signals the following text or field contents be printed on a line number you specify.
Space 6		The space 6 character was typed on a non-Displaywriter system. The Displaywriter ignores this code.
Spelling Language :(x)		The Spelling Language code signals the beginning of a text area to be spell checked in a different language. The ID letter (x) indicates the language chosen from the Spelling Language Dictionaries menu.
Spelling Mark Begin		The Spelling Mark Begin code signals the beginning of a word highlighted for a spelling check.
Spelling Mark End		The Spelling Mark End code signals the end of a word highlighted for a spelling check.

* Codes used with Reportpack.

TERM	GRAPHIC	DESCRIPTION
Start Alternate Fmt	☒	The Start Alternate Format code signals the start of the alternate format defaults.
Start Document Fmt	☒	The Start Document Format code signals the start of the document format defaults.
Stop	■	The Stop code indicates where text is to be inserted.
Substitute	—	The Substitute code is placed into text as a substitute for any character or code not available on the current keyboard arrangement.
Summary Math*	⊕	The cursor is under a Summary Math instruction.
Switch	■	The Switch code provides compatibility for output to magnetic cards.
Syllable Hyphen	-	The Syllable Hyphen code separates a word between syllables. The hyphen does not appear on the screen or print unless it ends a line.
System Pg. Number	⊕	The System Page Number code indicates that the system will assign page numbers in a header or footer.
Tab	→	The cursor is under a Tab code which indents one line of text.
Typestyle Chg xx	☒	The Typestyle Change code signals where the typestyle will change. The number indicates the typestyle number in effect.
Typestyle Return	☒	The Typestyle Return code places the original typestyle back into effect.

* Codes used with Reportpack.

TERM	GRAPHIC	DESCRIPTION
Unassigned Code	■	The Unassigned code indicates a code that the system cannot act upon.
Und	—	The Underline code underlines one character at a time.
Variable	⊕	The Variable code indicates where variable information is to be inserted in a standardized document.
Word Und	××	The Word Underline code underlines one word at a time.
Zero Index RET	←	The Zero Index Carrier Return code moves the printer element to the left margin of the same line. The text appears as two lines on the display.

KEYBOARD ARRANGEMENTS

This chart lists the countries, the language or the type of keyboard, and the corresponding keyboard identification (ID) numbers that are supported by the IBM Displaywriter System.

Following the charts are keyboard arrangements. These show where all the alpha, numeric, and special characters are located for the different keyboards.

Use these to determine which key to press on your own keyboard module.

PROPORTIONAL SPACING VALUES

Use this chart when you plan to print a document using a proportional space printwheel.

The chart lists the number of unit values assigned by the system for each alpha, numeric, and graphic character.

Because the screen does not indicate the proportionally spaced characters, use this chart if exact calculations are necessary.

LOWERCASE LETTERS	NUMBER OF UNITS	UPPERCASE LETTERS	NUMBER OF UNITS
a	5	A	7
b	6	B	7
c	5	C	7
d	6	D	7
e	5	E	6
f	4	F	6
g	6	G	7
h	6	H	7
i	3	I	4
j	3	J	5
k	6	K	7
l	3	L	6
m	7	M	7
n	6	N	7
o	5	O	7
p	6	P	6
q	6	Q	7
r	5	R	7
s	5	S	6
t	4	T	7
u	6	U	7
v	6	V	7
w	7	W	7
x	6	X	7
y	6	Y	7
z	5	Z	6

All numbers (0123456789) = 5 units.

All symbols, punctuation marks, space = 5 units, with the following two exceptions:

' (apostrophe) = 3 units

& (ampersand) = 6 units

SORT ORDERS FOR REPORTPACK ONLY

When sorting, the Displaywriter sorts symbols first, alphabetic characters next (regardless of whether the characters are uppercase or lowercase), then numbers.

The apostrophe and the required space are ignored during the sort.

Charts / Sort Order (Reportpack)

SYMBOLS		ALPHABETIC CHARACTERS	NUMERIC CHARACTERS
'	Apostrophe	a or A	0 Zero
RSP	Required space	b or B	¼ One quarter
SP	Space	c or C	½ One half
NSP	6 unit space	d or D	¾ Three quarter
¢	Cent sign	e or E	1 One
.	Period	f or F	2 Two
(Open parenthesis	g or G	
—	Minus/hyphen	h or H	² Two superscript
&	Ampersand	i or I	3 Three
!	Exclamation point	j or J	³ Three superscript
\$	Dollar sign	k or K	4 Four
±	Plus/minus	l or L	5 Five
*	Asterisk	m or M	6 Six
)	Close parenthesis	n or N	7 Seven
;	Semicolon	o or O	8 Eight
+	Plus	p or P	9 Nine
/	Slash/division	q or Q	
	Vertical line	r or R	
,	Comma	s or S	
—	Underline	t or T	
%	Percent	u or U	
==	Double underline	v or V	
?	Question mark	w or W	
:	Colon	x or X	
#	Number sign	y or Y	
@	At sign	z or Z	
<	Less than		
=	Equal		
>	Greater than		
"	Quotation mark		
[Opening bracket		
]	Closing bracket		
°	Degree		

CONTROLS ALLOWED IN A FILE TEXT FIELD FOR REPORTPACK ONLY

Not every control is supported on all keyboards. Some codes are not supported on any Displaywriter keyboard, but may be allowed in a text field received from another product.

Menu Sequences / Section Description

This section shows the sequence in which menus appear on the screen for every Displaywriter task and function. You can quickly determine the path for accessing a particular menu by using these menu sequences.

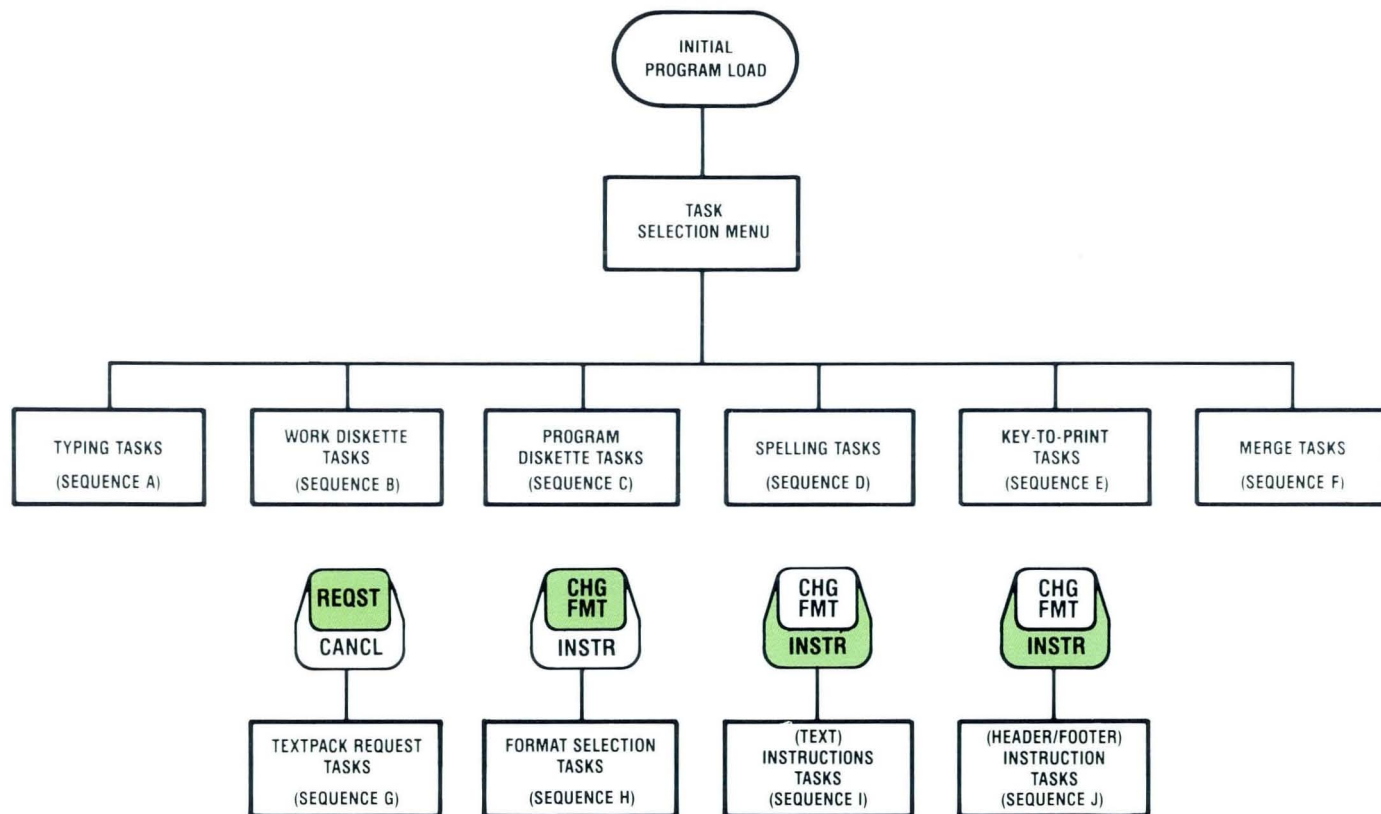

The menu sequences for most tasks start at the Task Selection menu, which appears when you perform an initial program load.

Each sequence level shows the menu choices you can make to get another menu.

Use these menu sequences to select the appropriate task.

The menu sequences for Request, Format Changes, and Instructions are listed as shown below.

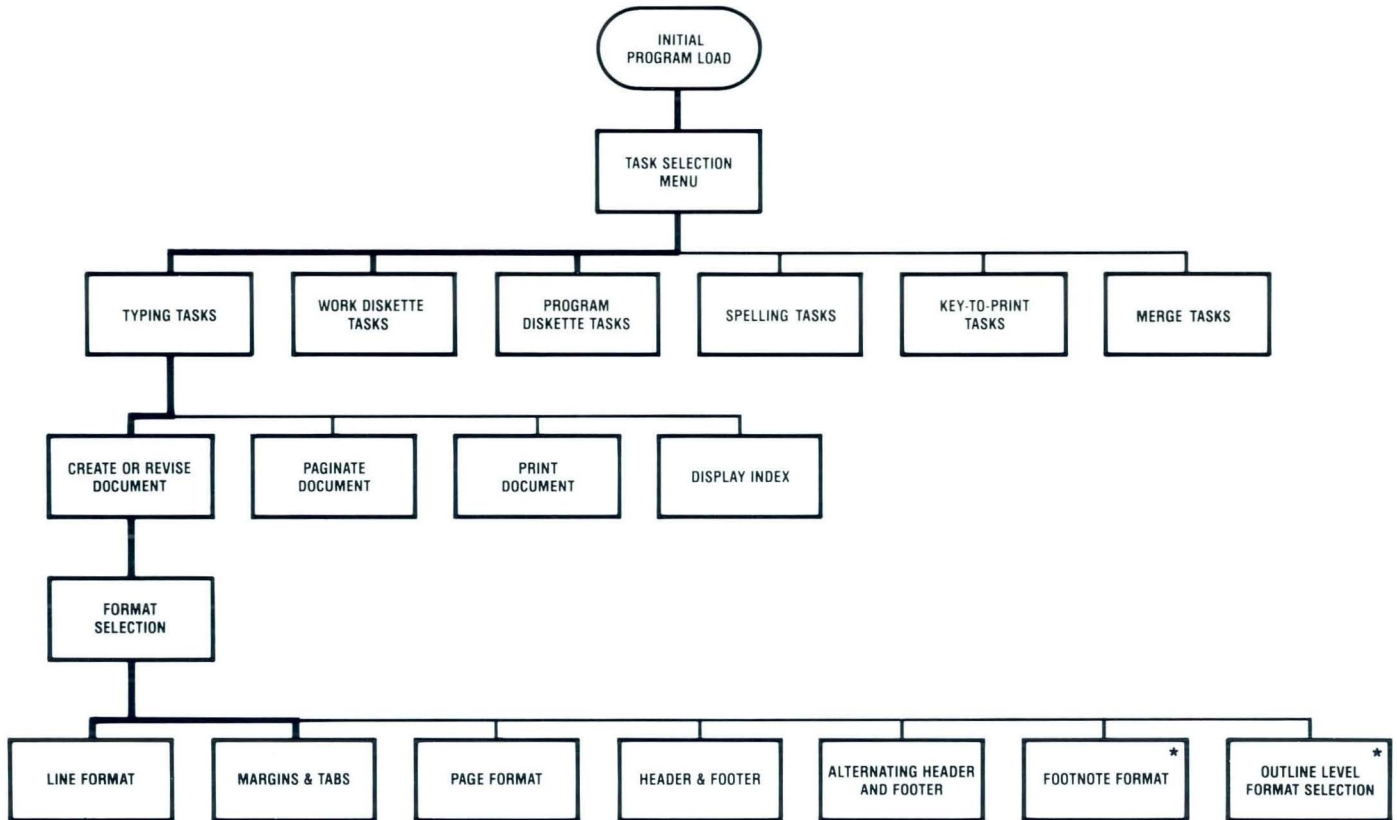

An explanation of how to read the menu sequences is provided on the next page.

Below is an explanation of how to read the menu sequences. Refer to the next page as you read the following explanation for locating the Margins and Tabs menu.

1. After loading the initial program diskette (level one), the Task Selection menu appears (level two).
2. The third level shows the choices you can make in the Task Selection menu. When you select Typing Tasks, the Typing Tasks menu appears.
3. In the Typing Tasks menu, you have the choices as shown by level four. To change margins and tabs, choose Create or Revise.
4. The next level shows the Format Selection menu.
5. In the Format Selection menu, you choose Margins and Tabs (level six) and make the desired changes.

Menu Sequences / Example

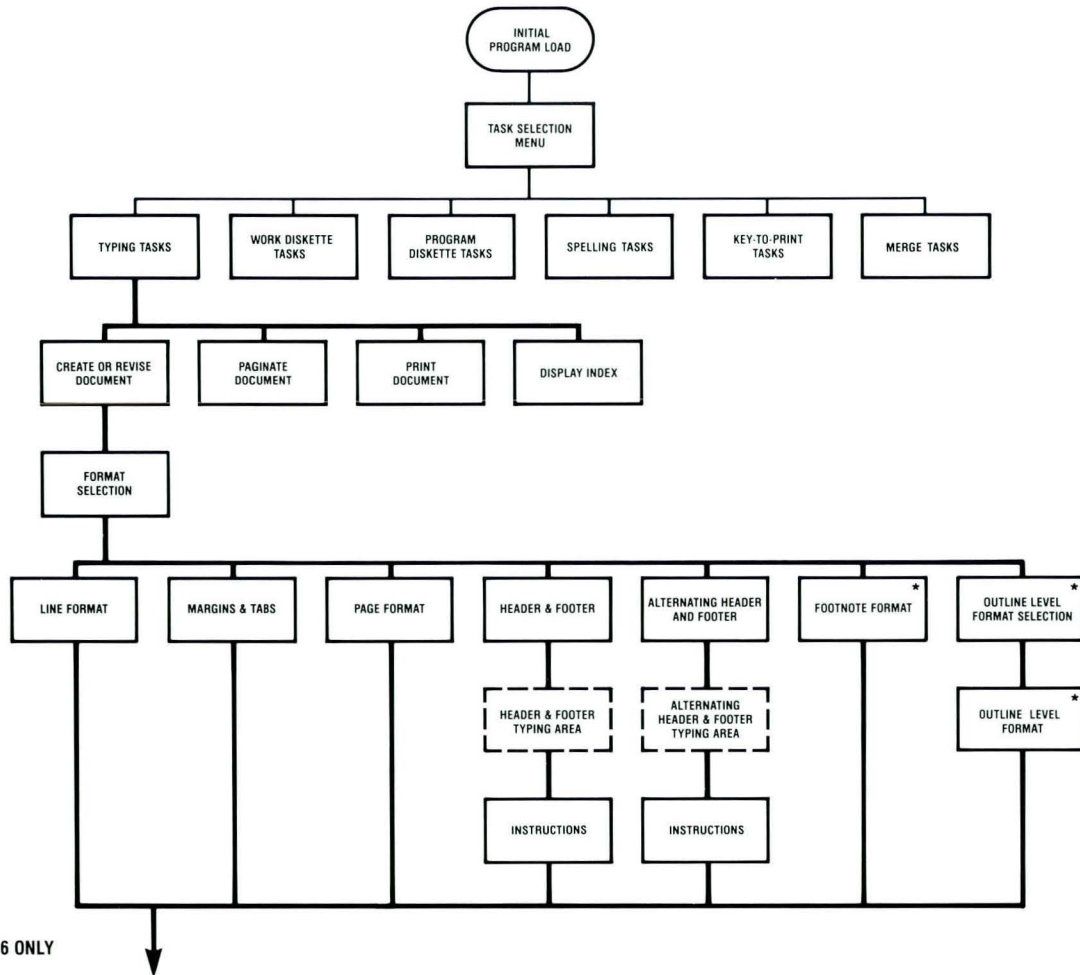

* TEXTPACK 6 ONLY

Menu Sequences / Sequence A: Typing Tasks

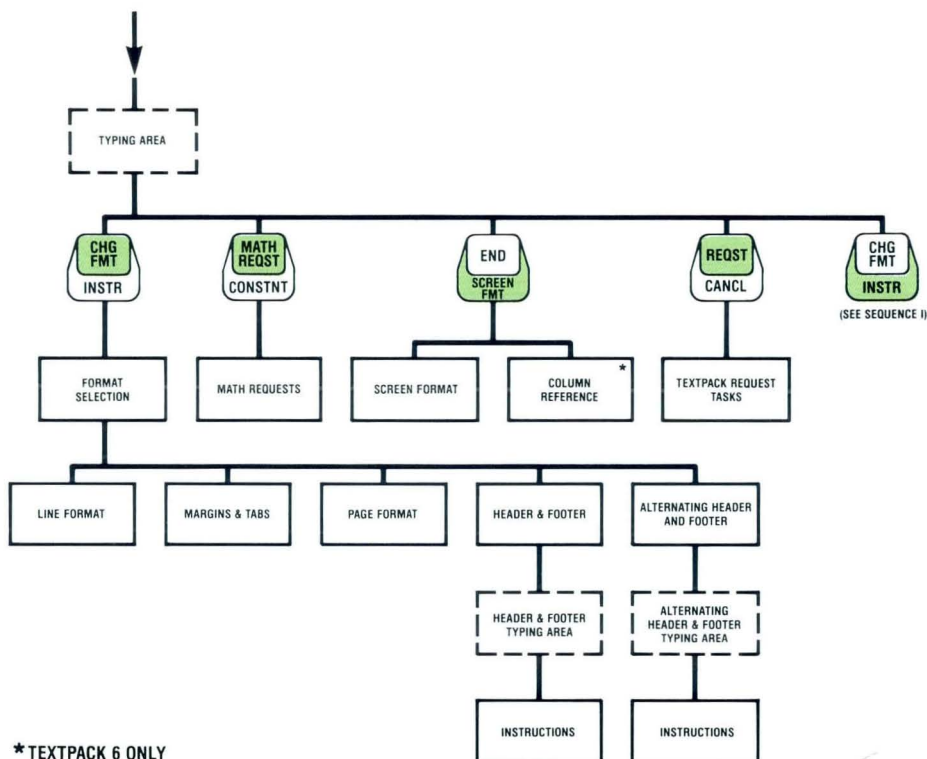

Use this menu sequence to create, revise, or paginate a document on a work diskette. The heavier lines show menus you can select *before* entering the typing area.

The menu sequence on the next page shows menus you can select from the typing area.

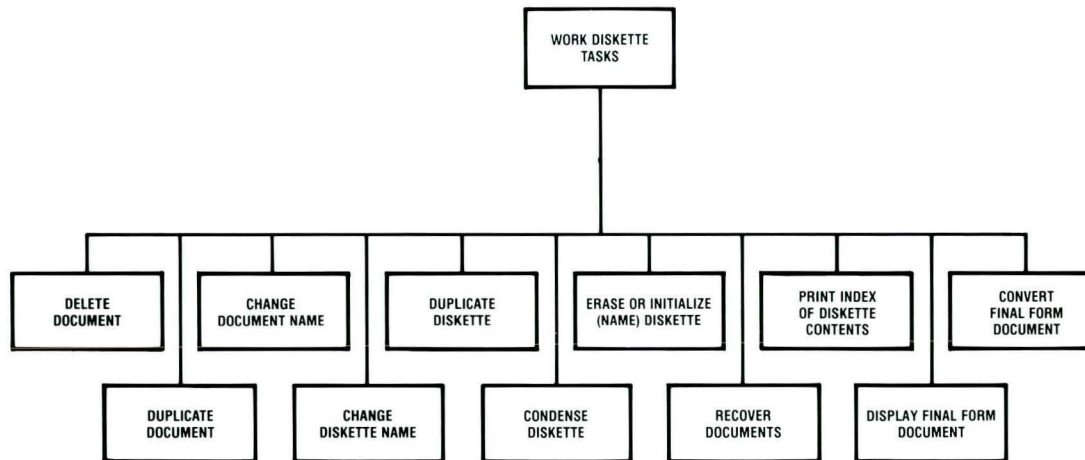

Menu Sequences / Sequence A: Typing Tasks

This menu sequence shows menus you can select from the typing area. The menu sequence on the previous page shows menus you can select before entering the typing area.

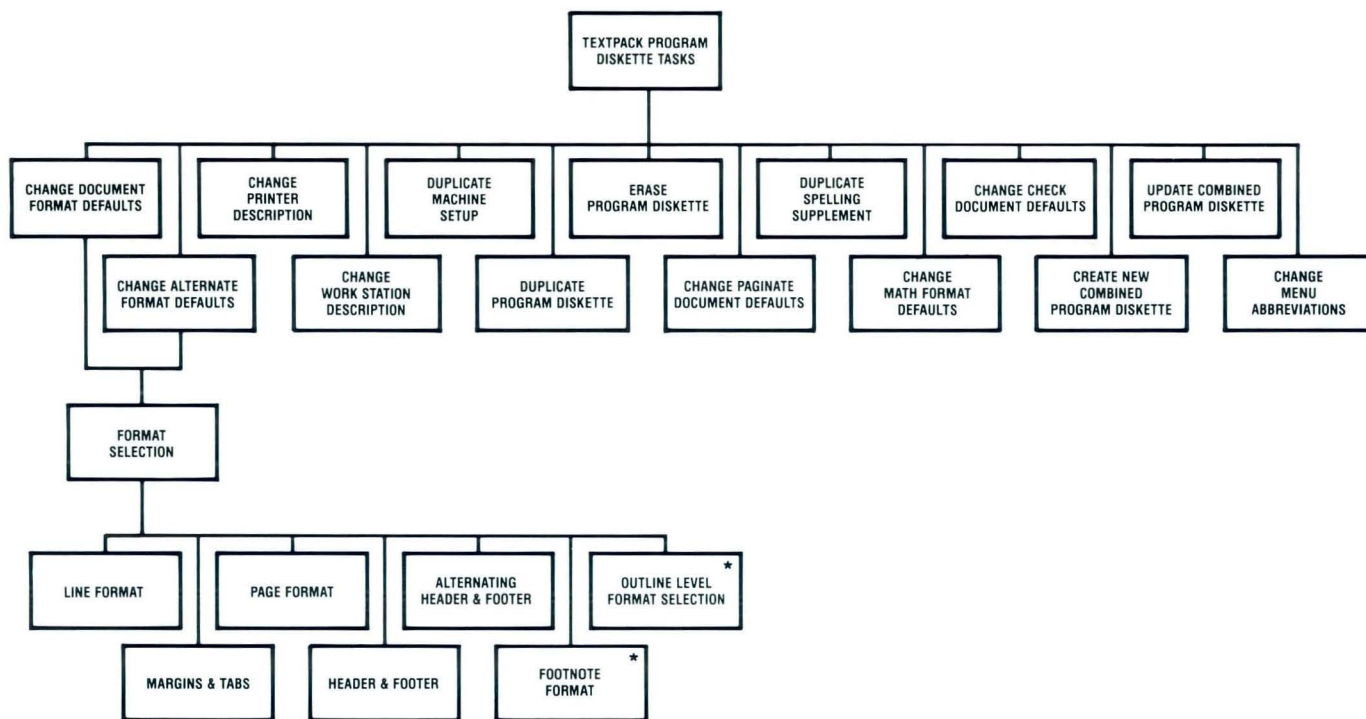

Use this menu sequence to use, update, or change a work diskette and its contents.

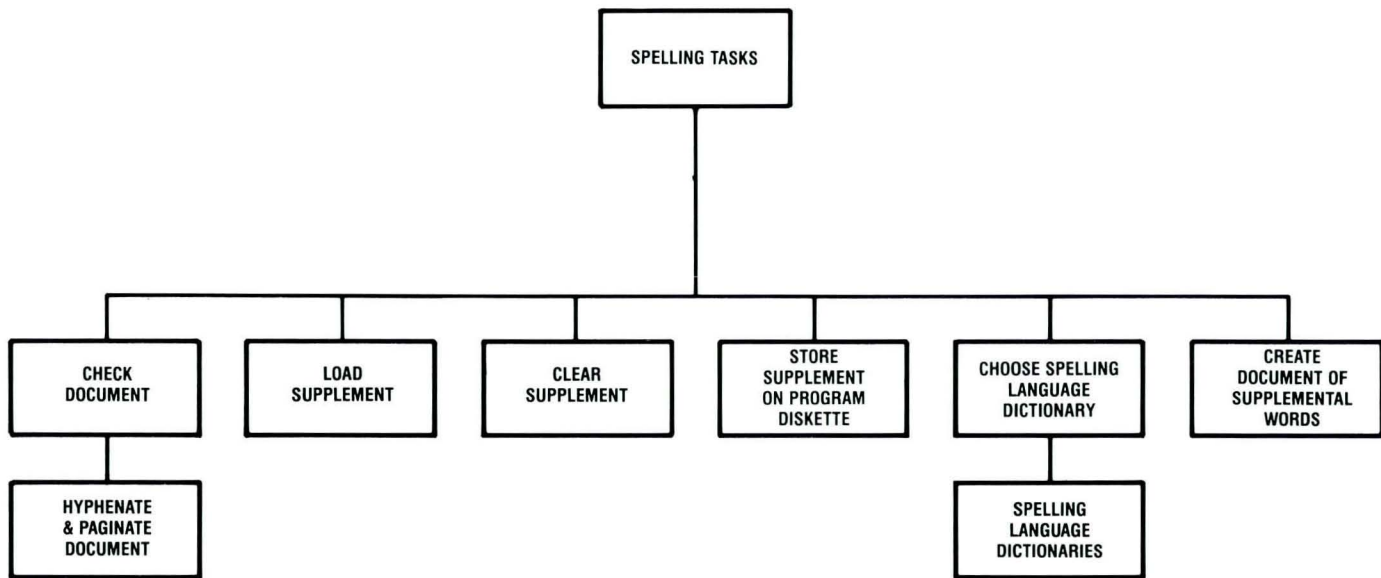

Menu Sequences / Sequence C: Program Diskette Tasks

Use this menu sequence to use and update a Volume 1 program diskette and change its contents, and to create or update a combined program diskette.

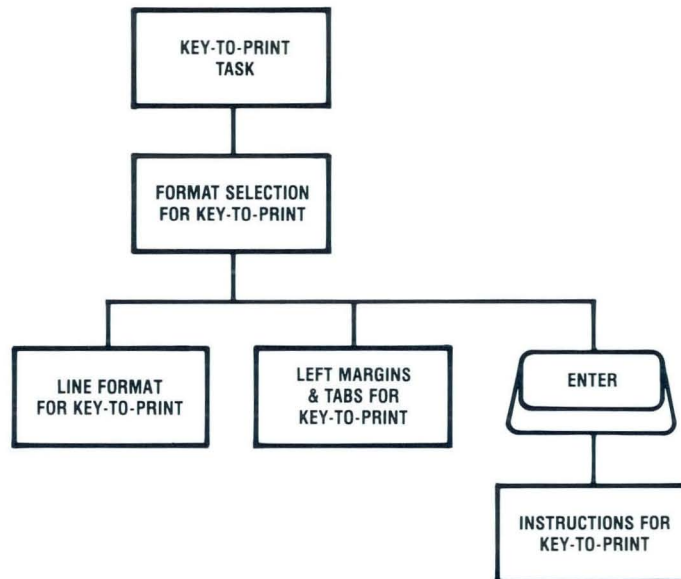

* TEXTPACK 6 ONLY

Use this menu sequence to check spelling in a document.

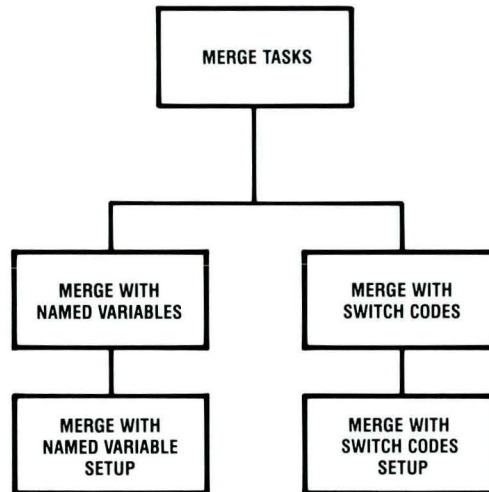

Menu Sequences / Sequence E: Key-to-Print Tasks

Use this menu sequence to type directly on paper. The text you type does not display and is not stored on a diskette.

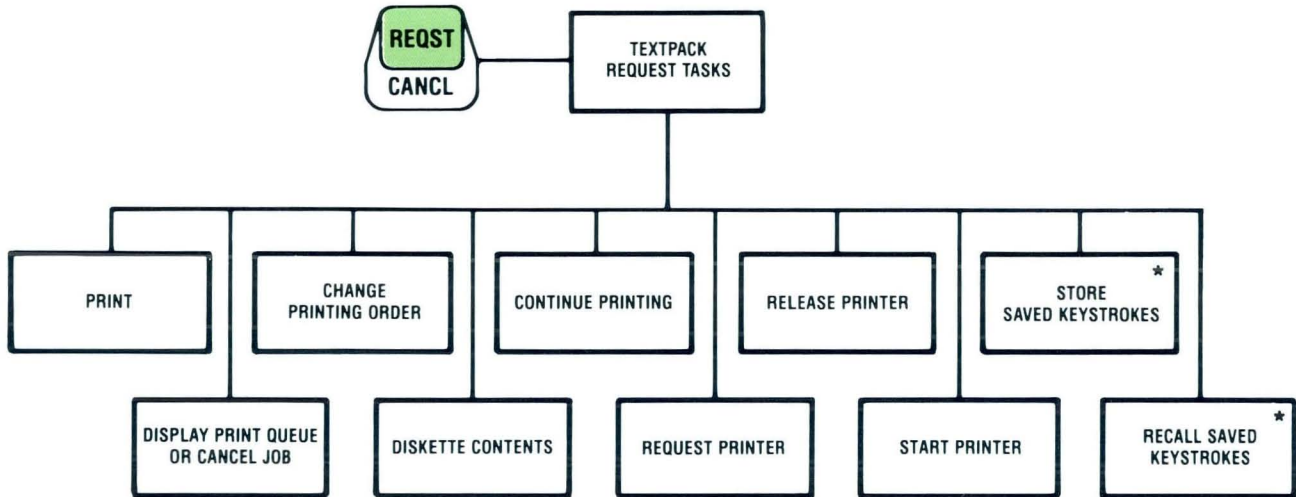

Use this menu sequence to combine shell documents with fill-in information.

Menu Sequences / Sequence G: Textpack Request Tasks

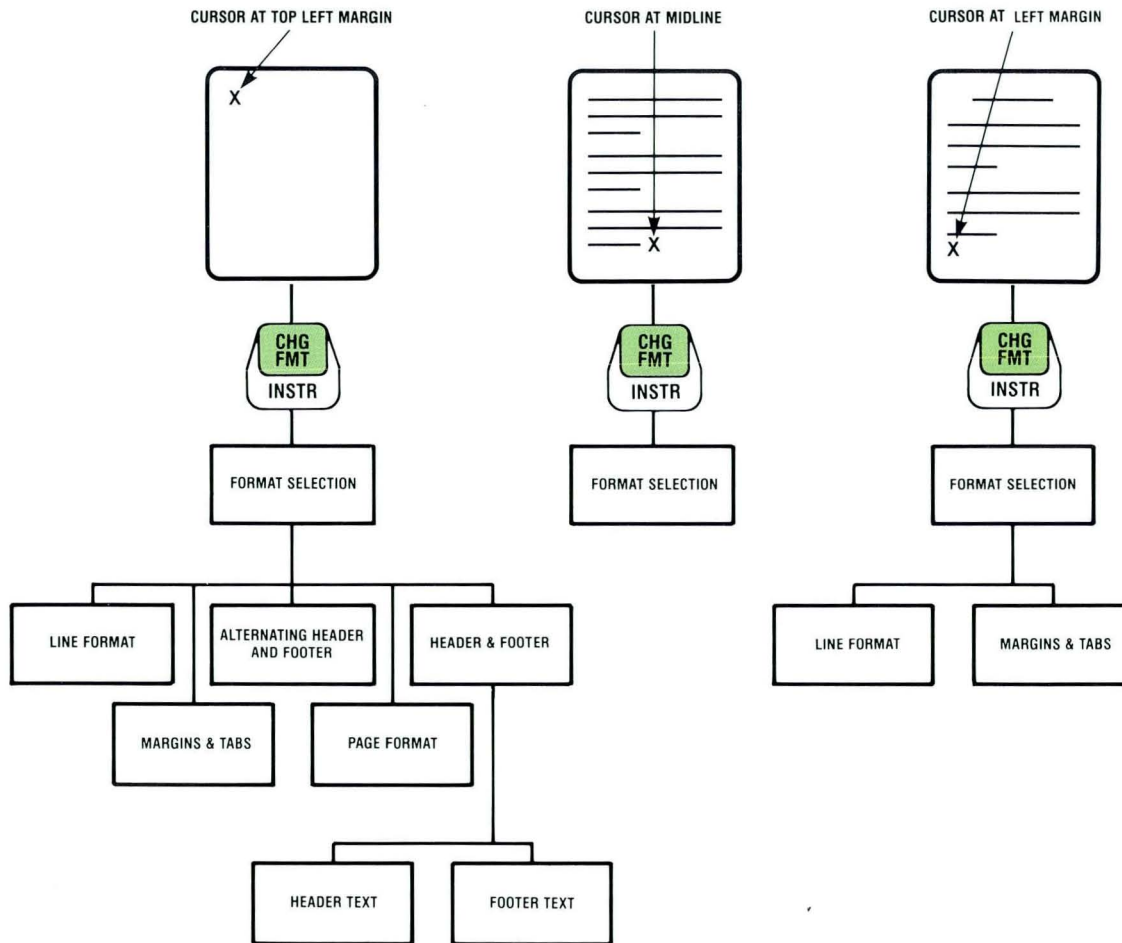

Use this menu sequence to make a print request or to display the diskette contents. The Textpack Request Tasks menu displays when you press the REQST key.

* TEXTPACK 6 ONLY

Use the Format Selection menus to change the current format of a document. The Format Selection menus that display when you press CHG FMT appear during the Create or Revise Document task. The available

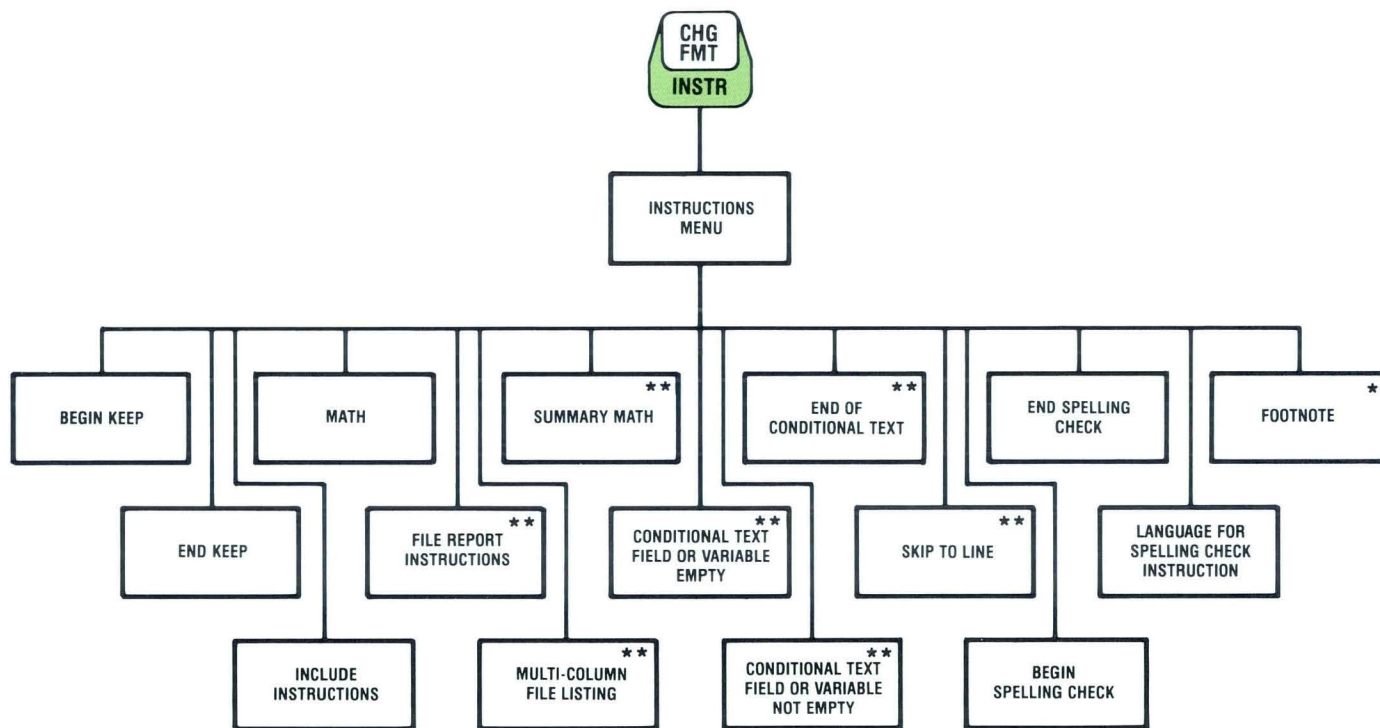

choices depend on whether the cursor is located at the top left margin, at the mid-line, or at the left margin when you press CHG FMT.

Menu Sequences / Sequence I: Instruction Tasks for Text

Use this menu sequence when you are creating or revising a document in the Create or Revise Document task. The Instructions menu displays when you press

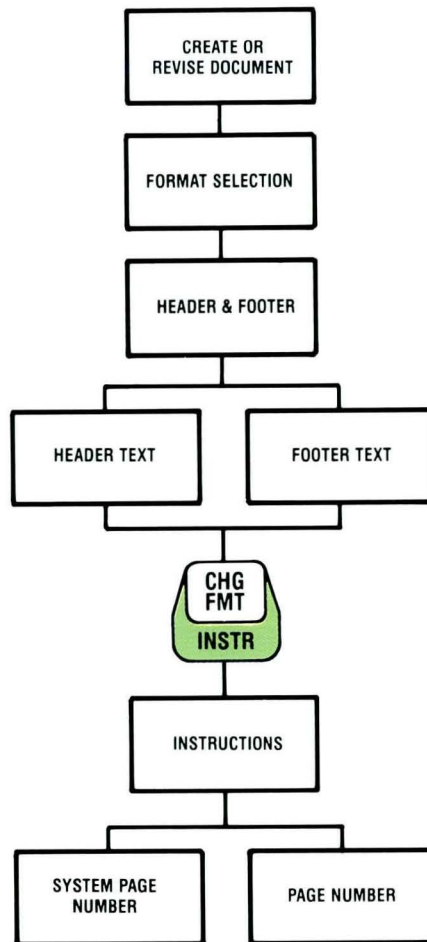

INSTR (See the Instruction Tasks for Headers/Footers on the next page when creating or revising a header or footer.)

* TEXTPACK 6 ONLY

** REPORTPACK ONLY

Use this menu sequence to create or revise a header or footer or an alternating header or footer.

SELECTION OF TERMS

This glossary is for Displaywriter users. It does not include terms from nontechnical dictionaries and terms that have no special meaning in text processing. Some terms may have different meanings in other contexts, or to people not familiar with text processing.

To maintain clarity and consistency of style, this glossary uses the same method of arranging and cross-referencing entries as the *American National Dictionary for Information Processing*.

Please see the *IBM Data Processing Glossary (GC20-1699-5)* for additional definitions and data processing terms.

ARRANGEMENT OF ENTRIES

Each entry consists of a single-word or multiple-word term followed by a description or a reference, or both. If the term has an accepted abbreviation or acronym, it appears immediately after the term in parentheses.

The glossary terms are listed in alphabetical order using the word-by-word method. Only the first element of a compound term is considered in the alphabetical order.

TERMS

A

add key. Adds a censored number to a displayed total.

adjust. The process of moving text to fit between the left and right margins.

aid key. Allows you to see possible spellings of a word the system did not recognize during the Check Document task. The AID key is active only during the prompted mode and requires the Spelling Aid Program/Dictionary to be loaded.

alphanumeric. Both alphabetic and numeric characters, usually including special symbols.

alternate format. A stored second format that can be changed.

alternate keyboard. Any of five preselected keyboard arrangements available on the program diskette that can be chosen using the KYB CHG key.

alternating footers. Two separate and distinct footers that alternate between pages of a document.

alternating headers. Two separate and distinct headers that alternate between pages of a document.

asynchronous communications. Data communication in which each character of data is individually synchronized on a communications line, usually by using a start bit and a stop bit.

auto carrier return. The ability of the system to place carrier returns automatically within the text and on the display screen. This is accomplished by moving whole words that exceed the line end zone to the next line.

auto line adjust. The process of moving text to fit between the left and right margins automatically when text is inserted or deleted and when the left, right, or temporary left margin is changed.

automatic mode. A form of system operation that requires no operator responses to complete a specific task.

automatic outline function. The feature that allows automatic numbering and lettering of up to eight levels of indentation of sequential listings in outline form.

B

backspace. To move one character position backward at a time.

backup copy. A diskette containing information copied from another diskette and used in case the original information is unintentionally altered or destroyed.

backup diskette. A diskette that contains information that was copied from another diskette. It is used in case the original information is unintentionally destroyed.

basic assurance test (BAT). An internal diagnostic program that is activated each time the system is turned on.

batch menu access. A Displaywriter function that allows the operator to enter, in the proper sequence, menu selections and responses to prompts without waiting for the menu or prompt to display.

batch printing. The ability to queue (place in a waiting line) up to six documents. While these are printing the operator can create or revise documents not in the queue.

begin keep code. A code that defines the beginning of a section of text to be kept together on the same page.

begin underline key. Marks the beginning of text to be underlined.

binary synchronous communications. Communication between computers using binary-coded data. Synchronization is maintained between transmitting and receiving stations by a specific bit pattern.

block overstrike. The ability to type one character on top of another. Can be used to indicate text that will be deleted later, or, in legal documents, to record revisions (example: *Bloek Overstrike*).

body text. The main body of text, excluding headers and footers on a page.

boundary down key. Moves the cursor to the end of the page being displayed.

boundary left key. Moves the cursor to the beginning of the line, to the left margin, or to the temporary left margin.

boundary right key. Moves the cursor to the last character of the line being displayed.

boundary up key. Moves the cursor to the beginning of the page being displayed.

C

cancel key. Cancels functions and clears prompts.

carrier return. The function of moving the printer element to the left margin of the next line.

center. To center text around the cursor position.

change format key. A key that allows you to change the layout of a document beginning at the point where the CHG FMT key is pressed.

character. A letter, number, or symbol that is displayed, entered, or printed.

character field. A file field designated to hold alphabetic, numeric, punctuation, and spacing characters, and on which sorting and selecting operations can be performed.

character position. On a display, each location that a character or symbol can occupy.

character string. Any group of characters the Displaywriter will search for in the Global Search and Replace function.

choice. An option in a menu that can be used to influence the operation of the system.

code. A graphic appearing on the screen that represents a specific function.

coded function. A function that occurs when the CODE key is held down while another key is pressed.

column. A vertical arrangement of text or numbers separated by blank space.

column add key. Adds a number in a decimal-aligned column to the displayed total and then moves the cursor to the next line.

column key. Used to create or revise a column using the column layout function.

column layout. A function used to help format, create, and revise complex tables of text or numbers.

column reference area. An area blocked off on either the top or side of the screen that contains column headings. These areas serve as points of reference when revising tables.

combined program diskette. In the IBM Displaywriter System, a diskette that contains more than one software program product.

comma separator key. Separates the document name from the work diskette name when both are typed on the prompt line.

comment. An area used in a menu to include descriptive information about a document. Comments are not treated as part of the text for any formatting function.

completion message. A message informing an operator that a function is complete.

constant. A fixed value.

constant key. Allows you to enter a constant to be used with math functions.

constant text. In a Merge File/Text operation, that part of the output that is not dependent on data from the file or from variables.

continuous paper. Connected paper forms that feed continuously through a printer.

control key. Allows alternate functions for some of the keys on the keyboard.

copy. The function of duplicating and moving a portion of text from one part of a document to another.

copy key. Allows you to copy text and put it in another place in a document while leaving it in the original location.

create document. To name, type, and enter a document for the first time.

cursor. A movable, visible mark used to indicate the current position on a display.

cursor movement keys. The directional keys ↑, ↓, ←, →, GO TO, and FIND keys used to move the cursor without inserting spaces, characters, or codes in text.

D

decimal alignment. To type and display aligned entries with a column on the decimal point. This implies right alignment when no decimal point is typed. Also called decimal tab.

dedicated printer. An equipment environment in which only one work station has the exclusive use of a printer.

default. A value, attribute, or option that is preassigned and assumed by a system when no other has been specified by the operator.

delete. To erase a code or a defined portion of text.

delete key. Allows you to delete text or codes from a document.

diagnostic aid. A tool (procedure, program, reference manual) used to detect and isolate a device or program malfunction or error.

dictionary hyphenation. Hyphenation performed, when necessary, by the system. Words are hyphenated as they are hyphenated in the IBM Displaywriter System dictionary.

digit. A numeric character of 0 to 9.

diskette. A thin, flexible, magnetic disk and its semirigid, protective jacket, in which the diskette is permanently enclosed. It provides reusable storage of documents that can be used and updated.

diskette contents. A licensed program of system instructions on a program diskette. A current list of document names and document information on a work diskette. The list may be displayed or printed.

diskette name. A series of characters recorded on the diskette to identify that diskette to the system.

diskette slot. The opening in the diskette unit into which a diskette is inserted.

display. To present text on a display surface.

display codes mode. The mode in which all control codes in the text stream are visible on the display.

display module. A unit that provides a visual interaction between the operator and the system.

display position. On a display screen, each location that a character or a symbol can occupy.

display work station. A device having a display station and a diskette unit.

divide key. Divides a displayed total or constant by the censored number.

document. Any information that is named and stored on a diskette.

document comment. An area used in a menu to include descriptive information about a document. It is not treated as part of the text for any formatting function.

document format. The selected arrangement of text for a specific document.

document name. A series of characters recorded on the diskette to identify a document to the system.

duplicate. To copy information from a location, leaving the information at that location unchanged, and to move the copy to another location.

E

end keep code. A code that defines the end of a section of text to be kept together on the same page.

end key. Automatically stores a document on the diskette.

end underline key. Marks the end of text to be underlined.

enter key. Causes the system to perform whatever task or function the operator has selected from a menu or specified with a function key.

entry. Information put into the system with the ENTER key.

erase. To remove text from a diskette, leaving the diskette available for recording new text.

error message. A displayed indication that an error has been detected by the system.

F

failure. The inability of a functional unit to perform its required function.

feature diskette. A licensed program diskette containing a Displaywriter optional feature program.

field. An area of a record containing a specific category of information.

field description. The designated name, type, and maximum length of a particular field in a file.

field name. An operator-assigned name that identifies a particular field in a record.

field type. A designation in a field description indicating whether a field is to be a character field, a math field, or a text field.

file. A set of related records, treated as a unit.

file description. All the field descriptions of a particular file, considered as a unit.

file name. A string of characters identifying a particular file.

file setup. The combined sort, select, and output information associated with a particular Output File, Merge File/Text, or Duplicate Selected Records task.

fill-in. A document containing variable names and variable information. A fill-in is merged with another document to create the finished document(s).

find key. Activates a search for a specific character string, up to 60 characters. Find is an exact-match function.

first status line. A line on the display screen which indicates special functions currently being performed, the document name, and the identity of cursored codes or symbols.

flush left. Aligned on the left. Flush left text or columns have even left margins.

flush right. Aligned on the right. Flush right text or columns have even right margins.

footer. Constant text that is formatted to be in the bottom margin of one or more pages.

footnote. A numbered note placed at the bottom of a page of a document that comments on or cites a reference for a designated part of the text.

footnote text. The words typed for a footnote. Does not include the footnote number or designation.

format. A set of specific conditions that determine the final position of text on a page.

format change. A point in the text where a change is made to the previous layout of the document.

function. A related set of codes that allows you to perform a specific job. For example, the Delete function.

function keys. Special keys that do not produce characters for printing when they are used, but allow you to give instructions to the system for additional functions. Included are the keys that normally produce a printed character, but when used with the CODE key produce a function instead.

G

get. The function of retrieving a defined block of text from a document and inserting it into the document currently being created or revised.

get key. Gets a copy of a document, a page, or pages from a document and puts it in a certain location in the currently displaying document.

global key. Displays the Global Replace/Delete menu. Used to replace or delete words or characters throughout a document.

global search. The process of having the system look through a document for specific characters.

go to key. Allows the operator to access a specific page, by number, within a document.

group definition. In an output document, the ability to separate portions of the output based on text or formatting controls.

H

hard copy. A printed copy of machine output. For example, a printed report, listings, documents, and summaries.

header. Constant text that is formatted to be in the top margin of one or more pages.

highlight. A brightened area on the display in reverse color of any characters within the area.

hyphenation. The process of separating a word by inserting a hyphen to end a line and moving the remainder of the word to the start of the next line.

include instruction. An instruction that allows including pages of text from another document in the text of an output document. The text is inserted during a Merge or a Get operation.

index. On a diskette, a list of document names and comments. A diskette index can be displayed or printed.

index key. Inserts an Index code into text without causing the cursor to move. The cursor moves to the next line of the display screen only if the cursor is at the left margin. When the document is printed, the Index code causes the print position to move to the next line without any horizontal movement.

initial program load (IPL). The process by which the system is turned on, then reads and stores the set of instructions that make up a program diskette. Once this process is completed, those instructions remain in effect until changed by loading another program diskette or until the power is turned off.

initialize. In the IBM Displaywriter System, to use the initialization procedure to prepare a diskette for use. See also **initial program load (IPL)**.

insert mode. A function that puts characters typed from the keyboard between existing characters.

insert/replace key. Puts the system into the Replace mode, which erases existing text as the operator types over it. Pressing this key again takes the system out of the Replace mode and into the Insert mode, which moves existing text as the operator types.

instruction. A direction that is displayed on the screen to help you perform a task.

instruction key. Causes the Instructions menu to display, allowing you to put instructions into the text of a document. These instructions are used by the system during text or records processing.

instruction symbol. Instructions represented by the symbol cause specific system functions to occur within the text.

IPL. See **initial program load (IPL)**.

J

job. A document that is sent to the printer.

justify. To print a document with even right and left margins.

K

key playback key. Allows you to play back, in a document, keystrokes that were saved using the Key Save function.

key save key. Allows you to save keystrokes typed in a document so you can play them back later.

key-to-print. A task allowing characters to print as they are being typed, as on a typewriter. The characters do not display and are not stored on the diskette.

keyboard change key. Allows you to change to another keyboard arrangement defined on the program diskette.

keyboard template. A chart to identify the location of special functions that are not marked on the keyboard.

keystroke save. The system function that allows you to save keystrokes to be repeated in a different location.

L

Languagepack. Program diskettes used to check documents in foreign languages. (Not available with Textpack E.)

layout key. Causes either the Create Column Layout or Column Insert Layout instructions to display. Used to space columns evenly between margins.

leading characters. Characters that can be chosen to precede a displayed mathematical calculation or footnote.

left margin. The area on a page between the left paper edge and the leftmost character position on the page.

licensed programs. Software programs which remain the property of the manufacturer, for which customers pay a license fee.

line. A row of characters (one or more) entered, displayed, or printed.

line adjust key. Causes the system to adjust the line on which the cursor appears.

line end zone. Character positions on a line before the right margin.

line format change. A format change made at the left margin on any line other than the first line of a page.

line number. A number associated with a line on a printout or display.

line spacing. The spacing between the type line of one printed line and the type line of the preceding line.

load. To put a program or information into the system from a diskette that is inserted into the diskette unit.

load lever. A mechanism on the diskette unit. When closed (horizontal), it causes the system to search, read, or store information on diskettes. When open (vertical), it allows you to insert or remove a diskette.

M

margin. The space between the text area and the bottom and side edges of a printed page.

margin text. Information printed in the top or bottom margin, or both, of a page.

mask. A group of characters used to exclude portions of a field from selection requirements.

math field. A file field designated to hold numeric data, and on which sorting and selecting operations can be performed.

math request key. Displays the math formats and allows you to change the sign of the active math formats and the total or constant, and perform other math-related functions.

menu. Choices listed on the display that can be selected by an operator.

menu bypass. The system function that allows you to skip the normal menu sequence to perform a task or to display a menu.

merge. The function that allows you to combine several documents to produce a single output document.

merge file/text. The function that allows you to combine a file with a shell document to produce an output document.

message. A message issued by the system because of a condition that requires an operator response.

message indicator. A visual indication (\Rightarrow) on the display informing you that a message is waiting.

message key. Displays and clears messages from the message queue.

message line. A line on the display on which messages are displayed.

message queue. A list of up to six messages waiting for operator response.

move. The function of moving a portion of text from one part of a document to another, deleting the original occurrence.

move key. Allows you to move text to another place in a document, removing it from the original location.

multiply key. Multiplies the displayed total by the censored number.

N

next variable key. Moves the cursor to the location of the next variable in text.

non-typing area. The blank space within text that occurs following a tab character or carrier return.

O

operate. To do work or to cause to work.

originator. The person who writes (authors) a document to be typed by an operator.

outline key. Allows you to put an outline level entry in a document. Each time you press this key the next outline level displays. Up to eight outline levels are available.

overstrike. To place a typewriter character on a space occupied by another character. See also **block overstrike**.

overstrike key. Allows you to overstrike text in a document.

P

page. In a document, a defined section formatted to be contained within specific boundaries, ending with a Page End or Required Page End code.

page end key. Inserts a temporary page end into a document. Pagination may move this page end to fit text onto a page, if needed.

page format change. A format change inserted at the top of a page, at the left margin.

pagination. The process of adjusting text to fit within margins or page boundaries, or both.

paper jam. A condition in which paper has not fed properly during printing and has become wedged in the feeding or printing mechanism.

paragraph library. A document in which single paragraphs or groups of paragraphs are stored as separate pages. These paragraphs can then be used in varying combinations in other documents via the Include instruction or by using the Get function.

percentage. The result of multiplying a number by a percent.

personalizing. The process of changing the IBM-supplied defaults to meet the needs of the application.

pitch. A unit of width of typewriter type, based on the number of times a character can be set in a linear inch. For example, 10-pitch type has ten characters per inch.

platen. A backing, commonly cylindrical, against which printing mechanisms strike to produce an impression.

print job. A document, or pages of a document, that the system has been instructed to print.

print key. Prints the page currently displaying in the Create or Revise Document tasks.

print queue. A waiting line or list of documents within the system ready to print in order.

printer. A device that produces copy from a system onto paper.

printer element. A typing ball used on an IBM Selectric Element Printer.

printwheel. A typing wheel used on an IBM printwheel printer.

problem determination procedure. A prescribed sequence of steps aimed at recovery from, or circumvention of, problem conditions.

program defaults. See **default**.

program diskette. The diskette on which a software program product is recorded.

prompt. Information that appears on the display to alert you to a specific condition or action needed.

prompt line. A line of the display screen on which prompts appear.

prompted mode. A form of system operation that requires operator actions during the task to complete the task.

proportional spacing. A method of spacing in which the space between characters varies according to the width of the characters. See the Proportional Spacing Values Chart in the *Reference Book*.

R

rearrange. The ability to output fields in an order or format different from the way they exist in a record.

record. A group of related fields, treated as a unit.

reference copy. The file copy of a shell document using variable information to complete it.

repetitive paragraph. See **stored paragraph**.

replace mode. A form of system operation that puts characters typed from the keyboard over existing characters.

reply key. Enables you to clear “insert diskette” messages.

Reportpack. A licensed program supplied by IBM that allows the creation and processing of records. Available on Textpack 4 or 6.

request key. Displays additional functions you can use during a task.

required backspace key. Moves the cursor and print position one character position to the left without deleting characters.

required carrier return. A manually entered carrier return used after short lines or at the end of paragraphs to ensure that no more text will be added to the line during the automatic rearrangement of text.

required hyphen. A permanent hyphen that will not be removed during pagination. The required hyphen is normally used between two words rather than between syllables of a word.

required page end key. Defines a permanent page ending, which cannot be overridden by pagination. Inserted by the operator during text entry or revision.

required space key. Prevents words from being separated on two different lines.

required tab key. Sets up a temporary indented left margin.

return. See **carrier return**.

revision. The process of changing the text or format, or both, of a document.

right align. The process of aligning lines of text at the right margin or tab setting. See **flush right**.

right justify. See **justify**.

right margin. The area on a page between the last text character and the right paper edge.

row. A series of numbers typed on the same line.

row add key. Adds a number aligned on a decimal tab stop to the displayed total and finds the next decimal tab stop position in the row.

S

scale line. A line on the display showing margins, tabs, and character positions.

scale line cursor. A visible mark that indicates on the scale line the current position of the cursored character on the display screen.

screen. The display surface of a display device.

screen down key. Moves the screen down a prescribed distance depending on the cursor position.

screen format key. Allows you to display all the codes in your document.

screen left key. Moves the screen left a prescribed distance depending on the cursor position.

screen movement keys. Keys that move the text on the display screen a prescribed distance depending on the cursor position.

screen right key. Moves the screen right a prescribed distance depending on the cursor position.

screen up key. Moves the screen up a prescribed distance depending on the cursor position.

scroll. To move the display image vertically to bring into view information that is above or below the display's boundaries.

second status line. A line of the display that includes the diskette name(s), page number, line number, keyboard number, and pitch.

segment. To move the display image horizontally to bring into view information that is to the left or right of the display's boundaries.

select. The ability to choose records or fields that meet certain conditions specified by the operator.

separator character. The character selected to make up the separator line. The system setting is hyphen.

separator line. In a footnoted document, the line of characters that divides the body text from the footnotes that appear at the bottom of the page.

sequence. (1) An order of succession. (2) A series connected at certain intervals.

set, setting. To put something into a predetermined position.

shared printer. An equipment environment in which more than one work station shares a single printer.

shell. A document containing text, variable names, or Stop codes to be used with another document to create finished documents.

shift character. A keyboard action to allow uppercase or other characters to be entered.

slot. See **diskette slot**.

space bar key. Adds one character space to the text.

spell key. Used to check spelling during document creation or revision. With the FIND key, allows the operator to access words highlighted by the spelling verification function.

spelling correction aid. This feature provides a list of possible alternative spellings for a word highlighted during Spell Check. Available on Textpack 6 only.

spelling language dictionaries. In the IBM Displaywriter System, dictionaries stored on Languagepack diskettes.

standard setting. A value preassigned by IBM to each menu item and assumed by the system when no other value is specified.

status lines. The first two lines of the display that indicate special functions currently being performed, the document name, the identity of the cursored codes or symbols, the diskette name(s), page number, line number, keyboard number, and pitch.

stop code. A code entered in a document of constant text, such as a shell document, to define the point at which variable text should be inserted.

stop key. Inserts a Stop code at the cursor position. This allows operator assistance for use with manual fill-ins.

store. To place information onto a diskette, where it is available for retrieval and updating, by pressing the END key.

stored paragraphs. Text stored in the document library that can be combined with text or other stored material to create a document.

subfield. A subdivision of a field.

subscript. The function that allows printing text and numbers one-half line below the normal printing line.

substitute code. A code that can be inserted into a document by the system. This occurs when the system is unable to identify a code during a magnetic card read, a receive, or a recover operation.

subtract key. Subtracts a cursored number from a displayed total.

superscript key. Moves text up one-half line.

supplement. An addition to something that already exists. For example, a spelling supplement is one or more words added to the system dictionary.

switch key. Inserts a Switch code at the cursor position. This code is used for compatibility when outputting a document to magnetic cards that will be played out on other IBM word processing equipment.

syllable hyphen. A hyphen used to temporarily divide a word at the end of a line.

symbol. The graphic on the scale line.

system page number. System-assigned identifier for a page of a document.

T

tab key. Inserts a tab character and moves the cursor to the next tab setting.

task. A type of work to be performed by the operator.

temporary left margin. The position on a page defined by the current indent level.

temporary page end. See **page end**.

Textpack. An IBM licensed program product for the Displaywriter.

thousands separator. The character, usually a comma, that separates the hundreds position from the thousands position in a number.

trail printing. Printing each page immediately after it is created or revised. (On Textpack E, you must load Print Tasks before the pages print.)

trailing characters. Characters that can be chosen to follow a displayed mathematical calculation or footnote.

typamatic key. A repeat-action key.

type element. A typing ball used on an IBM Selectric Typewriter. On printing devices, it is called a printer element.

typestyle. Characters of a given size, style, and design.

typing area. The portion of the display used to create or revise document text.

U

unload. To remove.

update. To revise with current information.

V

variable. Information (such as name, date, time) that can be inserted within a standardized document.

variable key. Inserts a Variable code into the text. You must name the variable. This is used for automatic variable fill-ins.

W

widow line. A single first or last line of a paragraph separated from its related text and appearing on a different page.

word underline key. Underlines the previous word.

work diskette. A diskette that contains documents.

work station. In the IBM Displaywriter System, the combination of electronics module, display module, keyboard module, and diskette unit.

Z

zero index carrier return (ZICR). The function of moving the printer element to the left margin on the same line.

zone width. The area before the right margin, defined in number of characters, in which hyphenation is allowed during Line Adjust and Dictionary Hyphenation.

HOW TO USE THE INDEX

This index is for the entire Displaywriter training program.

The index entries are organized alphabetically using the word-by-word method.

Entries for the training materials refer you to a specific unit, lesson, and segment in abbreviated form. For example, “get” refers you to **CTA, L-4, S-2**. This is an abbreviation for **Common Text Applications, Lesson 4, Segment 2**.

Entries for the reference materials refer you to a specific book and location in the book. For example, **RB, Charts, Metric Conversion**, refers you to the **Reference Book, Charts** section, **Metric Conversion** chart.

Use the abbreviations to identify the appropriate unit or book.

ABBREVIATIONS

SYT	= Starting Your Training
CTA	= Common Text Applications

This Newsletter No. SN44-2112
Date 21 October 1983

Base Publication No. S544-2262-0
File No.

Previous Newsletters None

**IBM Displaywriter System
Reference Book
Textpack 4/Textpack 6**

© IBM Corp. 1983

This technical newsletter provides replacement pages for the subject publication. These replacement pages remain in effect for subsequent versions and modifications unless specifically altered. Pages to be inserted and/or removed are:

20.1 and 20.2 (added)	148.1 and 148.2 (added)
42.1 and 42.2 (added)	158.1 and 158.2 (added)
84.1 through 84.4 (added)	172.1 and 172.2 (added)
120.1 through 120.4 (added)	

If you are inserting pages from different Newsletters/Supplements and *identical* page numbers are involved, always use the page with the latest date (shown in the change-page notice at the top of the page). The page with the latest date contains the most complete information.

A change to the text or to an illustration is indicated by a vertical line to the left of the change. Added pages are identified by page numbers followed by a decimal and one or two more digits.

Summary of Amendments

These prompts and messages are for the new function, Equation Typing/Printing, the IBM Front Exit Sheet Feed Paper Handler, and miscellaneous updates.

Note: *Please file this cover letter at the back of the manual to provide a record of changes.*
