

SOFTWARE PRICES

INTRODUCTION

There are two separate lists contained in this section. The Software Price List includes all types of software currently marketed by NAD and NMD. Only prices for billing plans currently marketed to commercial customers are included. The Software Upgrade List includes charges for the limited number of programs that can be upgraded.

This price list does not carry all feature codes assigned to a program number. Specifically missing are the following type feature codes:

- No charge types
- Asset assignments only codes (no charge types).
- Licensed program material types (such as publications, microfiche, and other non-machine readable materials), whether they have associated charges or not.

ORGANIZATION

The Software Price List is presented in program number sequence. Footnotes are kept to a minimum and, when practical, immediately follow each applicable software product. A hyphen indicates that a data field does not apply or no longer is available. Other special codes used will be explained in the legend.

LEGEND FOR SOFTWARE PRICE LIST

Column Heading	Explanation
PROGRAM/ FEAT NUM	The program number assigned to each software product. This column will also contain feature codes related to a program number. The characters #xxx in this column indicates that the feature code is not available at this time.
CHARGE TYPE	Identifies the types of charges associated with a program/ feature number and also what license type (Basic or DSLO) the charge is applied against. The codes used are: B/M = Basic License, Monthly Payment Period B/A = Basic License, Annual Payment Period B/I = Basic License, Initial Charge B/O = Basic License, One-Time Charge B/P = Basic License, Process Charge D/M = DSLO License, Monthly Payment Period D/A = DSLO License, Annual Payment Period D/I = DSLO License, Initial Charge D/O = DSLO License, One-Time Charge D/P = DSLO License, Process Charge SUC = Single Use Charge SCP = System Control Program
CHARGE AMOUNT	The dollar amount currently charged for each charge type.
CP	The number of Consecutive Payments for those charge types identified as periodic (monthly, annual). The codes used are: ## = Consecutive number (##) of payments after which further periodic charges will be waived. C = Continuous
(---LPSC---) Mon Mult	The Licensed Program Support charges (monthly or monthly multiple) for applicable program/feature numbers.
PROGRAM/FEATURE OTHER DESCRIPTION	This field is used to identify the program number or feature number on the same line. It is also used to provide explanatory information, when necessary.
