Swivel Base

MAGNAVOX
Smart. Very smart.

9CM080 MAC Color Display

Macintosh II® Compatible • This display is compatible with the Apple Macintosh II computer when it is equipped with a high resolution color card (Apple part # M0211)

Analog Input • The analog input allows you to display the more than 16 million colors that are possible when using the Macintosh II video card and expansion kit.

35kHz Horizontal Scanning Rate • This high horizontal scanning rate produces an exceptionally legible image. The horizontal scan lines are not visible.

66.7Hz Vertical Refresh Rate • Due to the increased vertical refresh rate, the image is flicker-free and rock-solid.

Easy Access Front Controls • Brightness and contrast controls are easily accessed from the front. A horizontal position and a vertical position control enable you to position your display in the exact center.

Personal Preference Rear Controls • Separate horizontal size and vertical size controls are provided on the rear to give you the freedom to adjust the size of the displayed image to suit your personal preference.

Interface Cable Supplied • A cable is supplied for quick and easy connection to your Apple Macintosh II® computer's video card.

Convenient Tilt/Swivel Base Included • For the maximum in user convenience, a tilt/swivel base is included with each Magnavox Analog Color display.
