Concept Index

"&" keywords . . . 168

reader macros . . . 374

%%kbd fields . . . 363

60ths of a second . . . 629

accessor function . . . 298
active process . . . 538
advice to functions . . . 592
alist . . . 74
allocation of storage . . . 91
alphabetic case . . . 144
alterant macro . . . 310
applicable function . . . 10
area . . . 62, 223
argument checking . . . 562
array . . . 10, 121
array initialization . . . 126
array leader . . . 124, 127
array-elements loop iteration path . . . 292
arrest reason . . . 538
association list . . . 74, 78
atom . . . 5, 9
attribute . . . 81
attribute list, file . . . 438

backquote . . . 251
Balance Directories . . . 446
band . . . 651
base-flavor . . . 348
basic definition . . . 155, 175
bignum . . . 102
binding . . . 7
blocks . . . 82
booting . . . 651
break loop . . . 644
breakpoint . . . 644
byte . . . 116
byte specifiers . . . 116

canonical type (of a pathname) . . . 459
capabilities . . . 450
car . . . 60
catch . . . 54
cdr . . . 60
cell . . . 197
character object . . . 384
character set . . . 362
circular list . . . 60
cleanup handler . . . 56
closure . . . 10, 180
combined-method . . . 332
compiled code . . . 602
compiler . . . 228
compiler warnings . . . 238
completion (of file names) . . . 446
complexnum . . . 102
condition handlers . . . 554
condition instances . . . 552
condition names . . . 552
conditional . . . 39
conditionalization, read-time . . . 376
conditionalizing clause(s), in loop . . . 283
conditions . . . 552
cons . . . 9, 60
constructor macro . . . 299, 308
control structure . . . 39
coroutine . . . 180, 186

daemon methods . . . 333
data type . . . 8
data type keywords, in loop . . . 286
dates and times . . . 628
debugger . . . 578
declaration . . . 233
declaring packages . . . 509
default (pathname) . . . 462
definition . . . 7, 154
defmacro . . . 250
defstruct . . . 298
dependency . . . 523
device (pathname) . . . 455
directory (of files) . . . 442
directory (pathname) . . . 455
disembodied property list . . . 82
displaced array . . . 125, 126
displacing macros . . . 267
dot, in symbols . . . 259
dotted list . . . 60, 373
dotted pair . . . 5

elements (of a list) . . . 60
encapsulation . . . 155, 175
entity . . . 10, 185
eq versus equal . . . 12, 13
equal versus = . . . 13
error system . . . 552
eval-when . . . 231
evalhook . . . 26
evaluation . . . 14
exit . . . 39
external value cell . . . 181

fascism . . . 450
fasdump . . . 245
FEF . . . 8, 163

file 431
file attribute list 438
file directory 442
file servers 450
filename 453
filename completion 446
fill pointer 124
fish 41
fixnum 102
flavor 321
flonum 102
flow of control 39
formatted output 411
formatting lisp code 426
function 10, 154
function cell 98
function entry frame 163
function renaming 179
function spec 154

garbage collector 646
generic pathname 467
grinding 426
grouped array 312

handling errors 552
hash table 83, 87
home directory 466
host (pathname) 455
host objects 480
host table 657

I/O stream 391
ignored arguments 240
index offset 125, 127
indicator 81
indirect array 125, 126
init file 466
initialization 624
input and output 362
input to the compiler 230
instance 321
interchange form of pathname components 457
internal value cell 181
interned-symbols loop iteration path 291
invisible pointers 202
iteration 39, 45, 274
ITS pathnames 473

keyboard character 363
keyword parameters 21
keywords in argument lists 49
kitty 44
kitty, yu-shiang 80, 415

lambda list 21
lambda-list keywords 168
lexpr 31
Lisp machine pathnames 476
lisp top level 644
list 60
LMFILE pathnames 477
loading 437
local variable 15
Local-File pathnames 476
locative 11, 197
lock 542
logical pathnames 477
loop 274
lower case letter 144

machine code 602
Maclisp file manipulation 483
macro character 374
macro defining macros 298
macro-defining macros 250
macros 248
mapping 57
MAR 599
merge (pathname) 454, 462
message 321
method 321
microseconds 630
mixin 348
module 522
monitoring the value of a variable 601
Multics pathnames 476
multiple accumulations, in loop 282
multiple values 33
multiprocessing 538

name (pathname) 455
named structure 312
named-subst 161
namelists (Maclisp compatibility) 483
naming convention 8
non-local exit 39, 54
number 9, 102

object 321
optimizer, compiler 243
optional parameters 21
order of evaluation in iteration clauses, in loop 277

package 506
package declarations 509
Paper tape punch 146
parameters 21
paranoia 451
parse (pathname) 454
partition 651
passwords 450
patch 531
pathname 453

period, in symbols . . . 259
plane . . . 139
plist . . . 81
positional parameters . . . 21
ppss . . . 116
predicate . . . 8
pretty-printing . . . 426
print name . . . 7, 99
printer . . . 367
proceed types . . . 569
process . . . 538
process wait function . . . 538
program source file . . . 437
property list . . . 7, 81

QFASL files . . . 228
querying the user . . . 620
quote . . . 28

rationalnum . . . 102
raw pathname components . . . 457
read-eval-print loop . . . 644
reader . . . 371
readtable . . . 379
record (structure) . . . 298
recursion . . . 39
rename-within . . . 179
required parameters . . . 21
resource . . . 91
rest parameters . . . 21
resumer . . . 187
returning multiple values . . . 33
rubout handler . . . 427
run reason . . . 538

S-expression . . . 5
saving the Lisp world . . . 651
scheduler . . . 539
sequential vs parallel binding and initialization, in loop . . . 276
set . . . 74
setf . . . 270
sharp sign reader macros . . . 374
signal names . . . 565
signaling conditions . . . 561
simple process . . . 549
single-character symbol . . . 381
site configuration . . . 657
site options . . . 657
slashification . . . 367
slot . . . 300
small-flonum . . . 102
sorting . . . 89
special character . . . 378
special forms . . . 164
special variable . . . 15, 232
stack group . . . 123, 186
stack lists . . . 80
status, of a patchable system . . . 536
stepping through evaluation . . . 596
storage allocation . . . 91
stream . . . 391
string . . . 10, 143
structured pathname components . . . 457
structures . . . 298
subprimitive . . . 200
subscript . . . 121
subst . . . 161, 255
substitutable function . . . 255
substitution . . . 70
supplied-p variable . . . 24
symbol . . . 7, 8, 96
system . . . 520
system maintenance . . . 531

tail recursion . . . 32
Tenex pathnames . . . 475
terminating the iteration, in loop . . . 282
throw . . . 54
times and dates . . . 628
TOPS-20 pathnames . . . 474
tracing function execution . . . 588
transformation . . . 523
tree . . . 60
Twenex pathnames . . . 474
type (pathname) . . . 455
types of arrays . . . 121

universal time . . . 628
Unix pathnames . . . 475
unspecific pathname components . . . 456
unwind protection . . . 56
unwinding a stack . . . 55
upper case letter . . . 144

value cell . . . 96
variable bindings, in loop . . . 278
version (pathname) . . . 455
Very Mangled Software . . . 475
VMS pathnames . . . 475

wait . . . 538
warnings from the compiler . . . 238

yes-or-no . . . 620
