PREFACE

This document contains schematics for the Wang VS-15/25/45 Computer System. It is used with the VS-15/25/45 Computer System Standard Maintenance Manual (document no. 741-1404/741-1032) and is organized in accordance with the approved STD outline established at the Field/Home Office Publications meetings conducted on September 14th and 15th, 1982. The scope of these manuals reflect the type of maintenance philosophy selected for this product (swap unit, printed circuit assembly, chip level or any combination thereof).

The purpose of the Standard Maintenance Manual and this Schematics Manual is to provide the Wang-trained Customer Engineer (CE) with instructions to operate, troubleshoot and repair the VS-15/25/45 Computer System. This manual will be updated on a regular schedule.

3rd Edition (November, 1984)

This edition of the VS-15/25/45 Schematics Manual obseletes documents no. 729-1185-A and 729-1185-A1. The material in this document may only be used for the purpose stated in the Preface above. Updates and/or changes to this document will be published as Publications Update Bulletins (PUB's) or subsequent editions.
