INTRODUCING

# BUSINESS IN A BOX

A LEAN, MEAN PROFIT MACHINE!

Includes  
Everything  
from  
Telemarketing  
to  
Accounting!

From EKD comes Business in a Box™ a vertical market software package that's horizontal! Because it's designed to automate any up and coming business. Any business. For under \$1,000.

That means every business in your area is a potential customer! And not just for the software, but for the related system hardware and training, too!

**A complete business management system!**

Not just an accounting package, Business in a Box is a completely integrated, multi-user software system that includes sales, marketing, word processing, customer service and support, and inventory control.

As well as general ledger accounts receivable and payable, sales order entry and purchase order entry, and more.

Plus pcANYWHERE for remote communications. PC Magazine's Editor's Choice for remote access software.

So you can support your customers from your office.

**Based on one of the best marketing designs in the world!**

Business in a Box is based on a successful mainframe design and reverse engineered to run on LAN technology. While at the same time it adds speed, flexibility and

user-friendliness to the overall system.

**It's simple to install, too.**

A self-installing, menu driven installation disk is included in the package, and if you have any questions EKD has a technical support hotline you can call for help.

**Open-ended design!**

Modifications can be made by qualified distributors and resellers for specific end-user needs quickly and efficiently. Because we make the source code available!

**Cash in a box!**

EKD also provides plenty of training, support and educational seminars to help you make money. Effortlessly!

For more information, or to place an order, call EKD. And cash in now!
