Problem

A problem has been reported in Inventory Control when a listing of Inventory by prefix is printed. Sometimes it is different from a complete listing of inventory. Usually the total cost and retail cost values are incorrect on the complete inventory listing. This can be caused by improper termination of the program or hardware fault during execution of the program.

Solution

1. Backup the diskette(s) and make the changes on the backup copy of the program.
2. In BASIC, load the program by typing LOAD"ICS".
3. Make the following corrections.

CHANGES (Retype the line or refer to the Edit section of your owner's manual)

Old Line: 1730 LPRINT"b":LPRINT"TOTAL ITEMS LISTED:";TAB(25)TI

New Line: 1730 GI=0:GC#=0:GP#=0:GR#=0: LPRINT"b":LPRINT"TOTAL ITEMS LISTED:"; TAB(25)TI

Old Line: 1790 GOSUB2540:GOSUB2600:GOSUB2610:RETURN

New Line: 1790 GOSUB2540:GOSUB2600:GOSUB2610:GOSUB4000:RETURN

NEW LINES (Type the line followed by an <ENTER>)

1725 IFGI<>TIANDGC#<>TC#ANDGP#<>TP#ANDGR#<>TR#THENGOSUB4050

4000 GC#=GC#+IQ%*IC:GP#=GP#+IQ%*IP:GR#=GR#+IO%*IC:GI=GI+1:RETURN

4050 TI=GI:TC#=GC#:TP#=GP#:TR#=GR#:RETURN

4. Type SAVE"ICS" to save the changes in the program.
5. At TRSDOS Ready, make a backup of your corrected diskette. If the totals are shown incorrectly when option(9) "Display System Status" is chosen, then print a complete listing and everything will be reset to its correct value for both options.
