Bulletin No. 1562-12 (Correction 1)*
Description PROFILE
Model Model III
Stock No. 26-1562 Ver. 03.04.00
Date April 10, 1983
Page 1 of 1

Problem

Profile will not run on LDOS floppy diskette.

* *   THE FOLLOWING CHANGES ARE REQUIRED FOR CONVERSION TO LDOS   * *

Solution

To convert PROFILE to LDOS Model III operation, two patches are required to correct an OS error code and to correct the INIT program to correctly size the minimum system diskette. Follow the steps listed below:

* The correction is underlined.

1. Make a backup of an LDOS system diskette.

2. Boot up that diskette and purge all files but CONV and PATCH by the following method:

    Type PURGE :Ø (INV) then answer Y to all files but CONV and PATCH

3. Place the TRSDOS PROFILE diskette in Drive 1.

4. Type CONV :1 :Ø then answer Y to the following files:

    PROFILE/CMD, INIT, ACCESS, SORT, PRINT.

    (The data files INFOFILE, LPFORM, and FORMFILE may be converted but there probably will not be enough room for PRODATA.)

5. PATCH INIT/ (X'7Ø62'=1A)
    PATCH INIT/ (X'738A'=B8 Ø1 B8 Ø2 B8 Ø2 B8)
