Problem

An error has been discovered in the storing of tabs in horizontal documents. The problem occurs when a tab stop is set on certain columns of the problem settings, the cursor would disappear and the system would lock up forcing the operator to RESET the computer. This does not damage anything on the disk! However, any text that had not yet been written to the disk is lost. The following patches fix this problem.

Solution

- 1. Reset your system and insert a Scripsit diskette.
- 2. Answer the Date prompt.
- 3. Press HOLD.
- 4. Answer the Time prompt.
- 5. At TRSDOS Ready, carefully enter the following patches.

PATCH SCRIPSIT A=9C9E F=78C621 C=CD3ØDC

PATCH SCRIPSIT A=9CB2 F=28Ø2F68ØD621 C=CD4ØDCØØØØØØ

- 6. Type STARTUP and press ENTER. Scripsit will load.
- 7. BACKUP the patched Scripsit disk!!
