CUSTOMER SERVICE BULLETIN

Problem

It has been discovered that SCRIPSIT will (at times) increment a character (if it follows a tab that is followed by a space) during print.

Solution

The following patches will correct this error;
1) At TRSDOS READY apply these patches on a backup copy of SCRIPSIT 2.Ø.

PATCH SCRIPSIT {A=D6CØ F=ØØØØØØØØØØØØØØØØØ C=7EFE2ØCA51F8FEØ9}
PATCH SCRIPSIT {A=D6C8 F=ØØØØØØØØØØØØØØ C=CA51F8C33FF8}
PATCH SCRIPSIT/SYS {R=158 B=81 F=BE2812 C=C3CØD6}

PATCH STARTUP {A=E4ØE F=B1B1AFB1B1AFB1B9B8B1 C=B1B1AFB2B4AFB1B9B8B1}

2) When these patches have been made, the SCRIPSIT initialization screen will show the date 11/24/1981 at the bottom. The 1Ø/16/1981 patches must be made before these patches are made.

3) You are now ready to resume use of SCRIPSIT 2.Ø.
