Problem

If you attempt to create a document on an almost-full SCRIPSIT diskette, no check is made to be sure that there is enough free space both to create the document and its first page. This results in "garbage" being displayed as the first page.

Solution

To fix the above problem, apply the following patches:

PATCH SCRIPSIT A=D686 F=ØØØØØØØØØØØØØØØØ C=2AØA811128ØØ3E96

PATCH SCRIPSIT A=D68E F=ØØØØØØØØØØØØØØ C=B7ED52D8116D4A

PATCH SCRIPSIT A=D695 F=ØØØØØØØØØØ C=DDE5ElAFC9

PATCH SCRIPSIT/SYS R=15 B=87 F=116D4ADDE5El C=CD86D6C2A93D

These patches will prevent SCRIPSIT from creating a document on any diskette that has less than 4Ø sectors free.

After applying the above patches, apply the following to change the date in the initialization screen (it should show up as Ø1/Ø8/1982 before you apply these patches; if not, obtain and apply all preceding patches first):

PATCH STARTUP A=E4ØE F=BØB1AFBØB8 C=BØB2AFB2B3

When this patch has been made, the SCRIPSIT initialization screen will show the date Ø2/23/82 at the bottom.
