PHONE _____ PRODUCT _____

SOFTWARE DIRECTORY

This directory is an attempt to further stimulate the software industry in Illinois. This goal is compatible with the recommendations of the Governor's High Technology Task Force Commission. Credit for the idea to identify, magnify and expand this industry through the issuance of a directory belongs to John A. Kennedy, whose article in Crain's Chicago Business was the impetus for this directory.

The information contained in this directory was obtained from documents supplied by respondents to a questionnaire. The State of Illinois does not assume responsibility for the accuracy of the information contained herein.

USER INFORMATION ABOUT THIS DIRECTORY

All the producers and distributors shown in this directory are listed in alphabetical order in the first section, entitled "PRODUCERS AND DISTRIBUTORS OF SOFTWARE PACKAGES". The listing includes the name, address and telephone number of a company as well as the name of the person to contact for information about the company's products and services. Additionally, the listing shows whether the software is intended for use with mainframe computers, minicomputers, microcomputers (or any or all of them), and in which areas of use the software is designed to function. Also, the listing shows with what equipment the software is compatible and in what languages the packages are written.

Following this alphabetical listing section, there are three sections, entitled respectively, PRODUCERS AND DISTRIBUTORS OF MAINFRAME SOFTWARE, PRODUCERS AND DISTRIBUTORS OF MINICOMPUTER SOFTWARE, AND PRODUCERS AND DISTRIBUTORS OF MICROCOMPUTER SOFTWARE. In each of these sections, a company's name and city are listed, but without any additional information. The companies in each section are grouped by city, and the cities are displayed in alphabetical order. To obtain additional information about a company and its products, a user simply turns back to the first section (PRODUCERS AND DISTRIBUTORS OF SOFTWARE PACKAGES) and locates the company's listing (which is in alphabetical order).

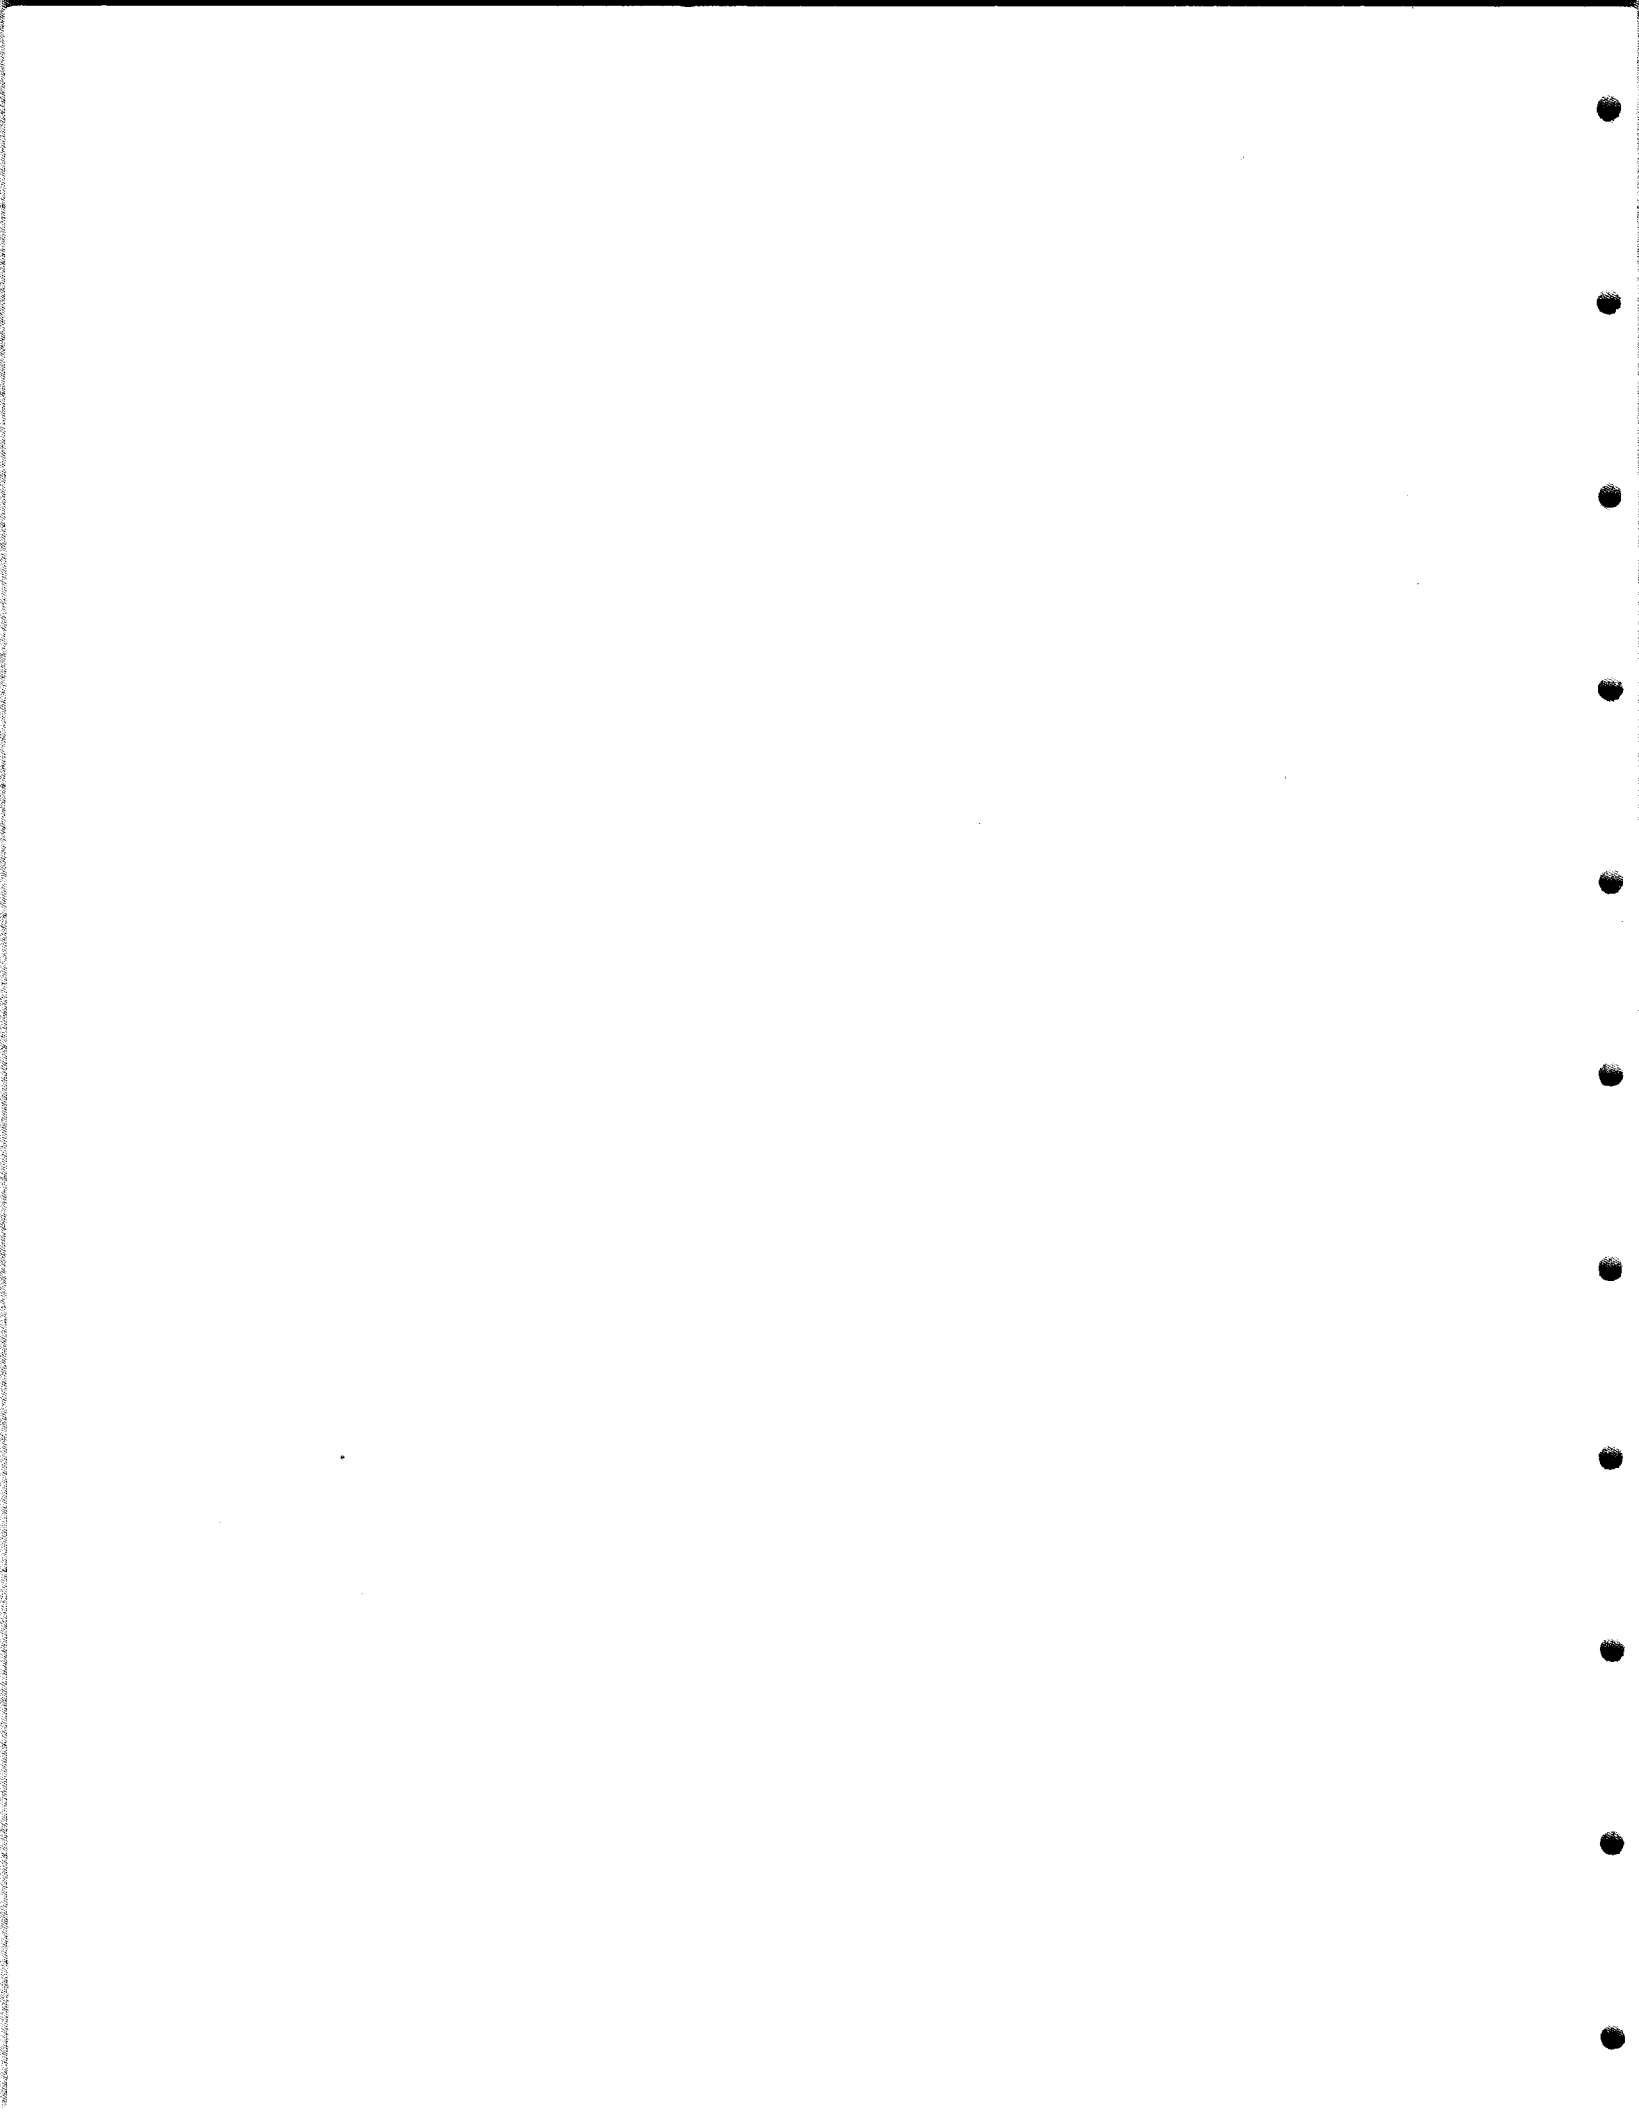

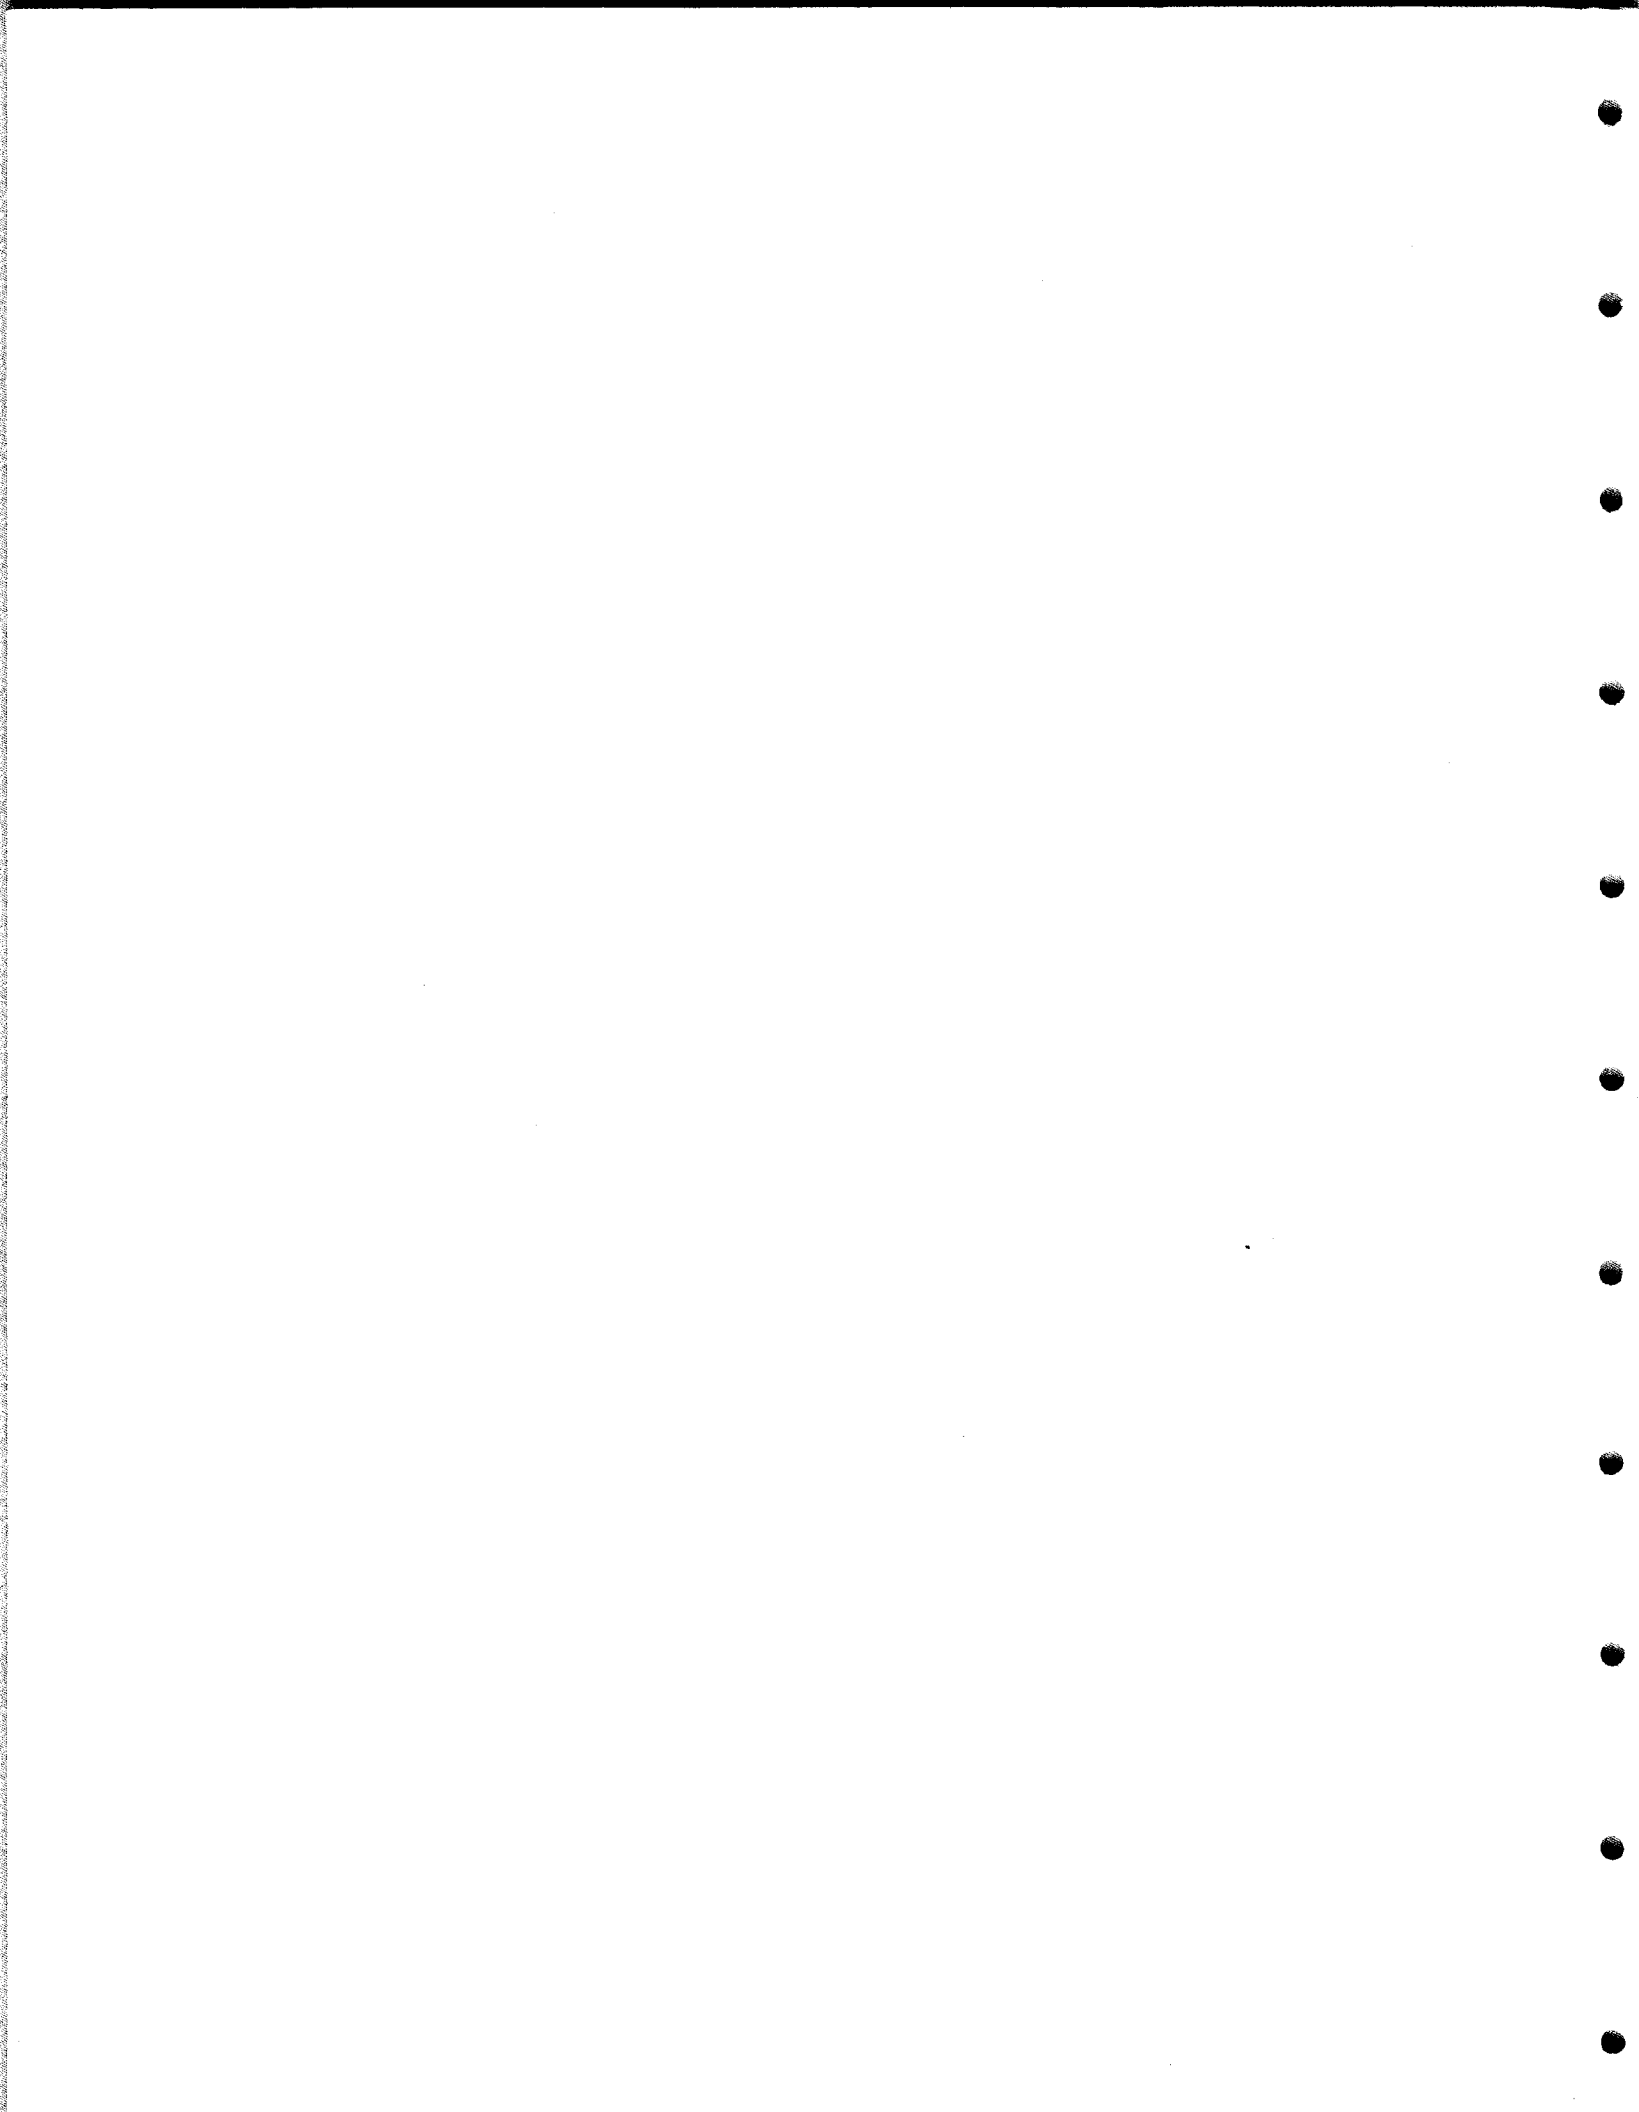

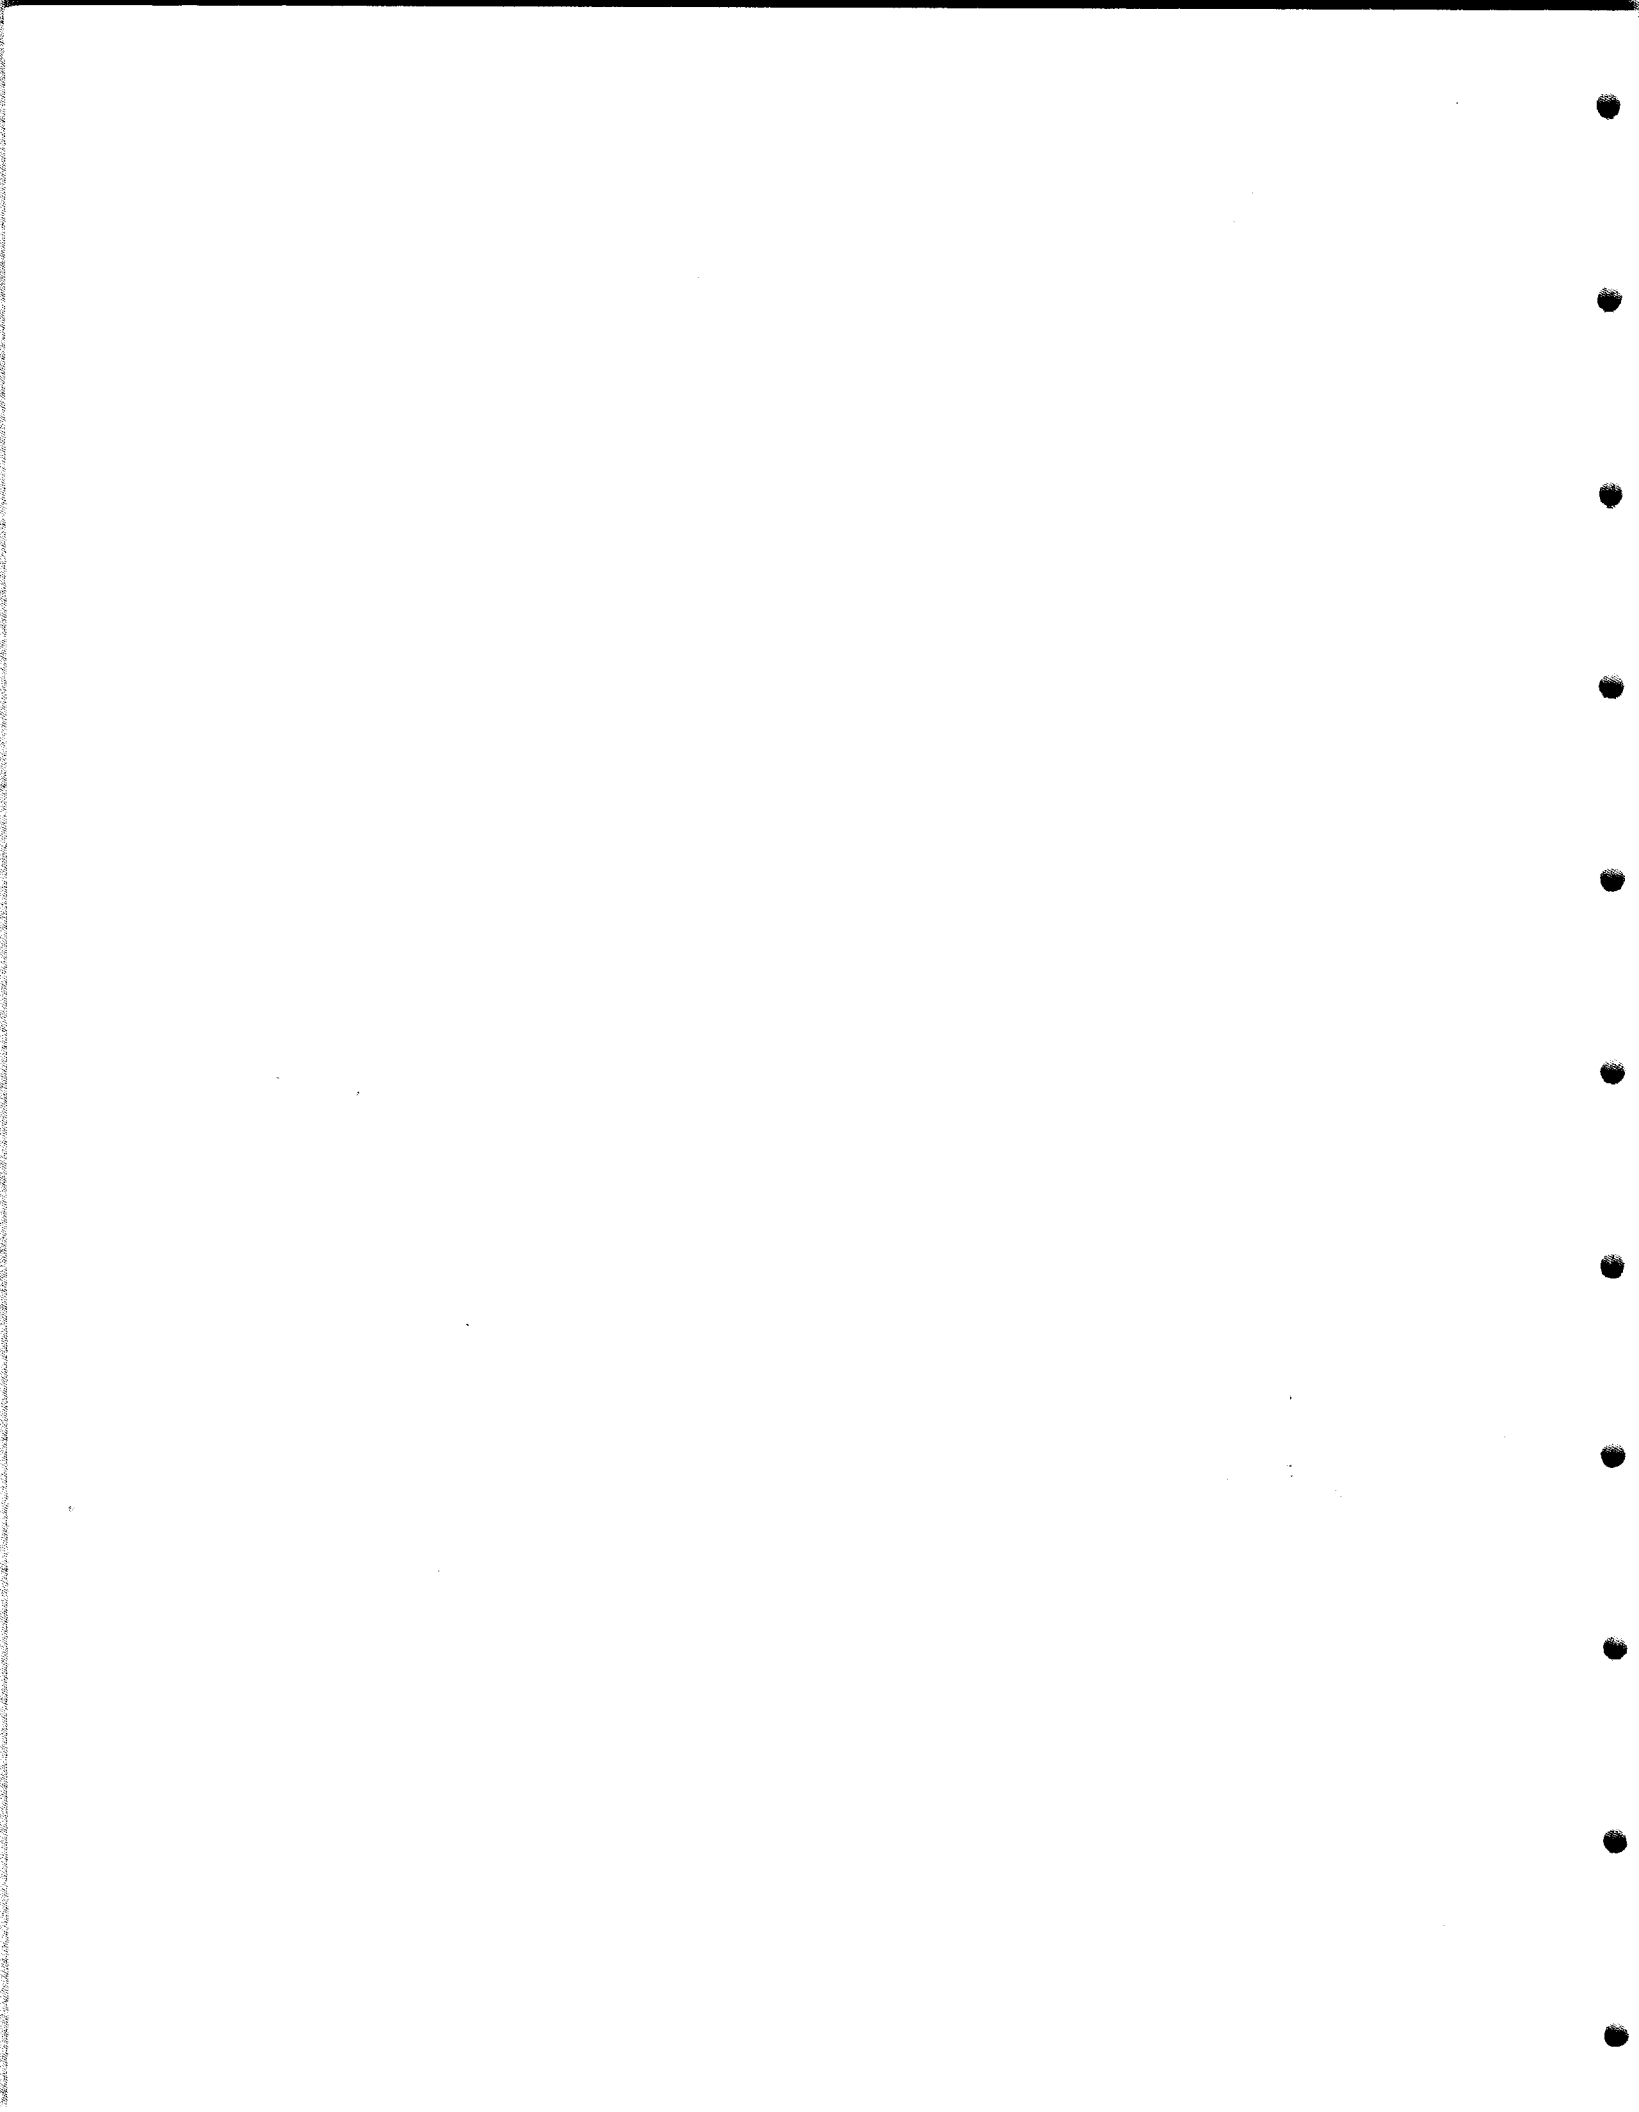

TABLE OF CONTENTS

<u>TITLE</u>	<u>PAGE</u>
